SAN DIEGO GAS & ELECTRIC COMPANY

December 18, 2023

BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA

Application of San Diego Gas & Electric Company (U902E) for Recovery of Undercollection Recorded in the Tree Trimming Balancing Account.	Application 22-12-008 (Filed December 9, 2022)

SAN DIEGO GAS & ELECTRIC COMPANY'S (U902E) RESPONSE TO A.22-12-008 ALJ RULING NOVEMBER 2023

I. INTRODUCTION

Pursuant to Administrative Law Judge (ALJ) Cai's Email Ruling Ordering SDG&E to Provide Invoices and Additional Information (Ruling) dated November 15, 2023, as modified by ALJ Cai's November 21, 2023, and December 11, 2023 email rulings, San Diego Gas & Electric Company (SDG&E) respectfully submits this Response.

Question 1:

Information on how costs recorded in the TTBA compare with authorized levels.

SDG&E Response to Question 1:

SDG&E's authorized forecasted revenue requirement for tree trimming is $24.8 million for 2020 and $25.4 million for 2021. This was approved for SDG&E's Tree Trimming Balancing Account (TTBA) in SDG&E's 2019 GRC Decision, D.19-09-051 (2019 GRC Decision).[1] Specifically, in that 2019 GRC Decision, SDG&E was "authorized to collect $24.2 million in revenue requirement for the TTBA, based upon a forecast that was derived by averaging the most four recent years of recorded TTBA costs (2013-2016)."[2] The Commission modified

---

[1] *See* Prepared Direct Testimony of Jason Kupfersmid on Behalf of SDG&E (December 9, 2022) (Ex. SDG&E-03 (Kupfersmid Direct)) at 2-3; Opening Brief of SDG&E for Recovery of Undercollection Recorded in the TTBA (September 22, 2023) (SDG&E Opening Brief) at 7.

[2] D.22-03-009 (2019 TTBA Decision) at 4; *accord* D.19-09-051 at 267.

SDG&E's TTBA from a one-way to a two-way balancing account, finding that, because "of enhanced wildfire risk, SDG&E may find it necessary to conduct enhanced and additional risk mitigation activities which are difficult to predict at this time."[3]

The Commission continued that a "two-way balancing account will enable SDG&E to act more quickly in case further activities to mitigate wildfire risk become necessary."[4] The Commission provided that SDG&E must file an application for recovery of undercollections in the TTBA when cost exceed 35 percent over the authorized level.[5]

All expenses related to TTBA activities are tagged and recorded to a balanced O&M code (TT) and offset against the authorized revenue requirement in the balancing account. Once tree trimming expenses exceed the authorized revenue requirement it becomes incremental.[6] SDG&E recorded tree trimming O&M expenses of $68.2 million in 2020 and $52.2 million in 2021, resulting in a net undercollection of $43.5 million in 2020 and $26.8 million in 2021.[7] Table 1 below details the comparisons of authorized revenue requirement, recorded expenses, and the calculation and summary of the undercollected amounts for 2020 and 2021.

Table 1

TTBA Summary ($ in Millions)		
	2020	**2021**
SDG&E 2019 GRC Authorized Revenue Requirement[8]	$ 24.8	$ 25.4
Admin	-	0.2
Cash Discounts	-	(0.1)
Catering	-	0.2
Consulting	0.3	-
Field Hardware and Support	0.2	1.5
Labor	1.1	-
Travel	-	0.3
Tree Trimming	66.5	49.9
Vacation & Sick Overheads	0.1	0.2
Total O&M	$ 68.2	$ 52.2
Interest	0.1	-
Net Undercollection - Incremental Expenses	$ 43.5	$ 26.8

Question 2:

Information on the activities that the TTBA costs supported and how much was spent on each activity, including:

a. Amount, date, vendor, and number of workers associated with the cost.

b. Amount of person hours worked.

c. An explanation of the activities involved.

d. Provide the five (5) highest dollar value invoices for each month in which expenses were recorded to SDG&E's TTBA for 2020-2021, relating to the activities involved or, if invoices are not available, an explanation of why, along with supporting documentation that verifies the total recorded cost and the specific activities associated with the cost.

[8] This is the test year authorized amount, plus escalation to arrive at the amounts for 2020 and 2021.

SDG&E Response to Question 2(a):

Please see Attachment A, titled: "Transaction Detail – Tree Trimming 2020 2021.Response.2A.2D.Confidential" (Transaction Detail Report), tab titled: "Transaction Detail," which provides the amount, date, and vendor by activity for costs recorded to SDG&E's TTBA for 2020-2021. The attached Transaction Detail Report contains Confidential and protected materials pursuant to Public Utilities Code Section 583, Decision ("D.") 06-06-066, D.21-09-020, and D.14-10-033, and General Order 66-D (Revision (Rev.) 2). The Transaction Detail Report reflects data that SDG&E extracted from its enterprise resource planning (ERP) system, Systems Applications, & Products (SAP), and its invoicing module within SAP, Construction Contracting Management System (CCMS), for expenses related to the TTBA.

SDG&E does not capture or track information regarding the total number of workers for each job because the number of workers needed for a project does not impact the fixed unitized cost to SDG&E for that project. Instead, as detailed further below, SDG&E is charged a pre-negotiated contracted fixed rate for the tree trimming activity. The contractor performing the tree trimming services determines the number of workers the contractor needs for a project, but it does not impact the price that SDG&E pays for the service. To answer these requests, however, SDG&E made its best efforts to reach out to its tree trimming vendors to obtain information on the number of workers for each activity based upon the vendor's records. This information is provided in response to 2(b).

For added context, below is a detailed explanation of how SDG&E negotiates competitive market rates with vendors, how a contractor bills SDG&E for a tree trimming activity, and how SDG&E reviews and approves invoices for tree trimming.

SDG&E Contractor Negotiations

SDG&E engages in a collaborative and extensive strategic sourcing initiative when selecting its vegetation management vendors in a competitive marketplace. SDG&E makes an initial request for service (RFS) from prospective vendors to qualify candidates. Prospective vendors are ranked and vetted through an analysis that includes safety, utility experience, work performance, rates, professionalism, sustainability, fiduciary responsibility, resource mobilization, and insurance coverage. Contracts are awarded to the highest qualifying vendors within each vegetation management activity. Service agreements are negotiated for a multi-year timeframe to capitalize on established rates, foster strong working relationships, and establish a consistent and stable workforce.

As noted, SDG&E generally negotiates vegetation management pricing for tree trimming and removal activities based upon fixed cost unit pricing.[9] That is, contractors charge SDG&E for a pre-established, fixed price for the tree trimming activity itself—regardless of the number of hours or personnel to perform the job. SDG&E Vegetation Management has used fixed pricing structure for tree trimming and removal activities for decades. Rates are established through a historical analysis of industry market rates for tree trimming and removal services based upon the scope, overhead, labor, insurance, equipment, and number of personnel for each type of activity.

Fixed pricing by unit has enabled SDG&E to create standardized activity codes that reflect the typical scope of tree trimming activities. And it creates a structure so that vendors can competitively bid for work. This pricing strategy has been successful at keeping rates as low as

---

[9] *See* Prepared Direct Testimony of Don Akau on Behalf of SDG&E (December 9, 2022) (Ex. SDG&E-02 (Akau Direct)) at 4; SDG&E Opening Brief at 4.

possible by incentivizing the efficient completion of a tree trimming activity without jeopardizing safety and compliance.

Tree trimming and removal activities may alternately be performed on a Time and Equipment (T&E) rate. Under Time and Equipment rates, the contractor charges SDG&E on an hourly basis instead of a fixed price for the tree trimming activities.[10] Because Time and Equipment rates are applied based on the number of hours of work performed, they generally result in higher costs than fixed pricing.

Work may be converted from fixed pricing to Time and Equipment hourly rates for many reasons, including the need for additional safety measures or restrictions, the need for specialized equipment such as cranes or loaders, the need for additional personnel, the need to remove large trees, extensive canopy pruning to abate a hazardous condition, emergency pruning, and/or specialized traffic control.[11] Pre-Inspection and Quality Assurance tree trimming activities (which are described in more detail in Section 2.c. below) are always performed and charged on an hourly basis as this work entails a high degree of variability associated with changes in work volume and scope, ad-hoc vegetation management activities, time to perform work, and customer engagement.

Unit cost work may also be converted to time and equipment if there is an unexpected change in the scope of work.[12] Examples include converting a large tree prune to a large tree removal, an excessive amount of time required to perform the work, or additional crews or equipment required to safely perform the work. If a contractor determines that a job requires

---

[10] Ex. SDG&E-02 (Akau Direct) at 4; SDG&E Opening Brief at 4.

[11] Ex. SDG&E-02 (Akau Direct) at 5.

[12] *Id.*; SDG&E Opening Brief at 4.

more time and resources than what is provided for by standard unit pricing, they may request conversion to Time and Equipment hourly rates. When requested, the SDG&E Area Forester will review the details of the job and determine whether an hourly rate should apply. A job is not converted from fixed pricing to hourly rates unless specifically approved by SDG&E.

SDG&E Invoicing System

SDG&E utilizes SAP. Within SAP, Contractors can invoice SDG&E for services performed utilizing two systems: SAP Ariba or SAP CCMS. The invoicing modules are configured to collect different levels of information and undergo various workflows.

SDG&E tells contractors which system to use depending on the activity. Contractors utilizing SAP Ariba are instructed to invoice against a general line item and provide supporting documentation. Contractors utilizing SAP CCMS, by contrast, are instructed to enter additional invoicing information such as the activity type line item, date of work, activity rate, quantity, and additional supporting documentation.

CCMS invoices are for the core vegetation management activities of pre-inspection, tree trimming and removal, and quality assurance. The CCMS module allows contractors to submit invoices utilizing standard rate activities and prices that are pre-populated along with supporting documentation. As each approved contractor can generate a significant number of invoices throughout the year against a wide range of tree trimming activities, contractors are required to utilize SAP CCMS as the rates are pre-populated without the need to validate the correct rate.

Following submission of invoices outlining the activity, quantity of rates, and all supporting documentation, a Service Entry Sheet (invoice) record is created by the contractor within SAP CCMS that SDG&E must review and process. SDG&E employees validate and

approve the invoice to ensure the appropriate rates are applied, supporting documentation is included, and assigned work is completed.

SAP invoices, by contrast, include direct vendor cost for material and product services that are pre-approved by internal SDG&E staff. Examples include:

- Trees purchased from a nursery by the Area Forester and provided to customers as replacements for removed trees;
- Green waste disposal of tree trimming and tree removal debris generated by the trimming contractor and delivered to local landfills and composting facilities;
- Third-party traffic control to provide additional roadside worker safety where necessary and approved by the SDG&E Area Forester; and
- The removal of hazardous trees utilizing cranes or specialized equipment that has been pre-approved by the SDG&E Area Forester.

SAP also captures the purchase, repair, and replacement of the work management mobile data terminal (MDT) that allow contractors to input the status of completed work activities in the field and upload the data nightly to the company server. This includes the cost for annual software licensing, software updates, and service fees for maintaining various reports used for tracking and invoicing of the vegetation management work activities which are assessed and pre-approved by the SDG&E Information Technology (IT) team and the Vegetation Management Manager.

SDG&E Invoice Review Process

As noted, SDG&E competitively negotiates rates with its contractors for different types of work. The negotiated costs to perform the work are task based. That is, they are measured either by the number of trees completed (trimmed/removed) or the number of hours to complete the work.

All contracted work activities are recorded in a database called Epoch, which is the field application of the work management system that utilizes Geographic Information System (GIS)

mapping, imagery, and asset data records. Every month, contractors are assigned Scheduling Work Orders for the Vegetation Management Areas (VMA) where routine work is scheduled. SDG&E creates multiple Dispatch Work Orders under each Scheduling Work Order for the purpose of assigning work packages to multiple crews or individuals to complete the work.

Contractors then complete their assigned projects. The tree trimming vendors invoice when all work assigned in smaller work packages is complete. These are generally work orders with a small number of trees that take up to two weeks to complete. Larger work orders that may contain thousands of trees associated with an individual VMA that may take more than 1-2 months to complete are generally invoiced monthly.

Once the contractor completes a job, they bill SDG&E via SDG&E's invoicing systems. As noted, for completed tree trimming and removal work, invoicing is entered in the SAP CCMS system using the specific activity codes associated with the type of work performed.[13] The activity codes differentiate types of work such as tree trimming or removal, type of equipment, and/or the type of work. Again, costs to perform the work are based on the number of trees trimmed or removed, or on an hourly basis under Time and Equipment rates.

Invoices submitted in CCMS by the vendor often include attached documentation that provides supportive information about the work. This includes worker timesheets, daily logs, weekly summaries, assigned work orders, change order documentation, summary reports, customer refusal forms, tree removal authorization forms, email communications, and other supporting documentation.

---

[13] *See* Rebuttal Testimony of Don Akau on Behalf of SDG&E (July 31, 2023) (Ex. SDG&E-05 (Akau Rebuttal)) at 14; Reply Brief of SDG&E for Recovery of Undercollection Recorded in the TTBA (October 6, 2023) (SDG&E Reply Brief) at 7.

Invoices submitted by the vendor are reviewed and approved by the SDG&E representative who manages that activity (Tree Trimming, Pre-inspection, Quality Assurance), including the Area Foresters and Contract Administrators. Each invoice is reviewed for accuracy and completeness including the number of units, hours worked, applicable rates, total cost, and supporting documentation. Individual invoices that exceed the total cost approval level of the Area Forester or Contract Administrator are elevated to the SDG&E Supervisor or Manager for final review and approval.

The invoices and documents supporting SDG&E's TTBA undercollection request largely relate to tree trimming and removal activities associated with all the routine scheduled work and the ad-hoc, unscheduled or prioritized work that occurs throughout the year. This is reflected in the fact that SDG&E's undercollection is almost entirely resulting from tree trimming activity.

SDG&E Response to Question 2(b):

As noted, SDG&E does not track the number of contract crew workers for each individual job completed because it does not impact the cost for the tree trimming activity. Instead, as explained in response to 2(a), contractors either charge SDG&E based upon a fixed rate for the tree trimming activity or by a Time and Equipment hourly rate.[14] The contractor bills the same amount regardless of how many workers the contractor assigns to a task.

For tree trimming and removal activities, a standard crew make-up consists of two individuals. Although a tree contractor may utilize a three or more-person crew if a job requires it, most jobs are performed using the standard two-person crew. But if a job is very complex, requires substantial time to complete, and/or requires specialized traffic control, multiple crews

[14] *See* SDG&E Reply Brief at 7 ("Contractors invoice SDG&E for the tree trimming activity itself.") (citation omitted).

may be assigned to help complete the assigned work. SDG&E contacted its contractors in its best effort to obtain the number of workers and hours worked for each activity based upon the contractors' records. Table 2 below provides the aggregated total number of person hours worked annually for each activity, and the total number of workers for each of the vegetation management activities, as provided by SDG&E's contractors.

Table 2

Vendor 2020	Activity	# Workers	Hours Worked
Davey Resource Group	Pre-inspection	48	99,794
Davey Tree Surgery	Trim & Removal	106	253,987
Utility Tree Service	Trim & Removal	174	322,529
Western Environmental Consultants, Inc.	Quality Assurance	31	46,000
2020 Totals		**359**	**722,310**
Vendor 2021	Activity	# Workers	Hours Worked
Davey Resource Group	Pre-inspection	55	108,022
Davey Tree Surgery	Trim & Removal	109	212,362
Utility Tree Service	Trim & Removal	107	205,790
Western Environmental Consultants, Inc.	Quality Assurance	33	39,800
2021 Totals		**304**	**565,974**

SDG&E Response to Question 2(c):

SDG&E defines its core vegetation management activities included under the TTBA as follows.

- **Pre-Inspection**: The field inspection of a tree to determine whether pruning is required for encroachment by growth or hazard;
- **Tree trimming**: Routine or enhanced pruning to achieve clearances for safety, compliance and reliability in accordance with regulations;
- **Field Memo**: Priority pruning or removal to abate a non-compliant or imminent threat to the power lines;
- **Hazard**: A tree that is dead, dying, diseased, or structurally unstable that poses a threat to the power lines;
- **Removal**: A tree that is removed down to ground level; and
- **Auditing** (Quality Assurance): Assessment of completed vegetation management activities for quality, performance, and contractual adherence.

As can be seen in Table 3 (and as discussed further below), tree trimming, field memo, hazard, and removal can qualify for either fixed unit or Time and Equipment Hourly rates depending on the task, while pre-inspection and auditing are always hourly rates. The increase in core tree trimming activities and associated increases in labor costs to perform those activities effectively constitute SDG&E's entire undercollection for 2020 and 2021

Table 3

2020 Cost Driver	Approximate Cost	% of Undercollection
Tree trimming, Field Memo, Hazard, Removal (T&E Hourly)	$24,360,000	56%
Tree trimming, Field Memo, Hazard, Removal (Unit Cost)	$13,920,000	32%
Pre-inspection (T&E Hourly)	$3,480,000	8%
Auditing / Quality Assurance (T&E Hourly)	$1,740,000	4%
Total Undercollection	**$43,500,000**	**100%**
2021 Cost Driver	**Approximate Cost**	**% of Undercollection**
Tree trimming, Field Memo, Hazard, Removal (T&E Hourly)	$11,524,000	43%
Tree trimming, Field Memo, Hazard, Removal (Unit Cost)	$11,256,000	42%
Pre-inspection (T&E Hourly)	$2,680,000	10%
Auditing / Quality Assurance (T&E Hourly)	$1,340,000	5%
Total Undercollection	**$26,800,000**	**100%**

The undercollection from these core tree trimming activities compared to the 2019 GRC forecasted costs resulted from the approval of SDG&E's 2019 Wildfire Mitigation Plans (WMP) and subsequent updates, the implementation of additional COVID-19 protocols, and the application of Senate Bill (SB) 247 in January 2020, which raised labor costs for tree trimming.

That is, in response to California's catastrophic wildfires in 2017 and 2018, SB 901 required each electric utility to adopt an approved Wildfire Mitigation Plan.[15] The Commission approved SDG&E's first WMP for 2019, finding that SDG&E "proposed to increase [SDG&E's] vegetation management efforts to mitigate wildfire risks."[16] The Commission's Wildfire Safety

[15] SDG&E Opening Brief at 5.

[16] D.22-03-009 at 4.

Division and its successor, the Office of Energy Infrastructure Safety (Energy Safety), likewise reviewed and approved these initiatives in SDG&E's 2020, 2021, 2022, and 2023 WMP updates.[17] The increased inspections, enhanced tree clearances of up to 25 feet, hazard tree remediations, and audits to comply with SDG&E's WMP—and the resulting increase in use of Time and Equipment hourly rates to meet these enhanced activities in addition to SB 247 raising tree trimming labor rates—are what has principally led to SDG&E's TTBA undercollection in 2020 and 2021.

SDG&E manages approximately 500,000 trees in its service territory. Nearly half are in High Fire Threat Districts (HFTD).[18] SDG&E subdivides its service territory into 134 VMAs. The VMAs were determined using jurisdictional boundaries, geographical distinctions, and distribution of tree density.

Each VMA is identified using a three-digit number and has approximately 2,000 to 5,000 inventory trees. An inventory tree is defined as a tree that may encroach the required minimum clearance of eighteen (18) inches as specified in General Order (GO) 95, Rule 35 in the non-HFTD; and four (4) feet as specified in GO 95 and Public Resources Code Section 4293 in the HFTD within three years of inspection.[19]

SDG&E Vegetation Management follows an annual, Master Schedule of interrelated activities to ensure completeness of all required work and to remain compliant throughout the

---

[17] *See* SDG&E 2020 WMP, available at https://www.sdge.com/2020-wildfire-mitigation-plan; SDG&E 2021 WMP, available at https://energysafety.ca.gov/what-we-do/electrical-infrastructure-safety/wildfire-mitigation-and-safety/wildfire-mitigation-plans/2021-wmp/.

[18] *See* Ex. SDG&E-02 (Akau Direct) at 3, 5; SDG&E Opening Brief at 3, 5-6.

[19] Ex. SDG&E-02 (Akau Direct) at 2-3.

year including pre-inspection, tree trimming and auditing to ensure completeness, as detailed below.

Pre-Inspection Activities

The first activity in the Vegetation Management Master Schedule is Pre-inspection. SDG&E uses a contracted workforce, *The Davey Resource Group,* to perform this activity using International Society of Arboriculture (ISA) Certified Arborists who perform the routine inspection, off-cycle patrols, and hazard tree assessments in the HFTD. Pre-inspection is performed by qualified and trained individuals with knowledge of tree species, growth potential, and hazard characteristics. The Pre-inspection vendor receives Scheduling Work Orders (SWO) each month for the scheduled VMAs, each with a pre-defined number of trees to be inspected. The vendor then divides the VMA Scheduling Work Orders into multiple Dispatch Work Orders (DWO) and assigns the work to the pre-inspectors. Work assignments are supervised by the vendor's lead, who has the responsibility of training, performance reviews, verifying work accuracy, and resolving customer issues.

The Pre-inspector patrols the electrical lines (secondary, distribution, and transmission voltages) to determine which trees require pruning or removal for safety, compliance, and reliability for the annual cycle, adds any new trees to the inventory that meet the criteria, and removes trees that no longer meet the criteria as result of being removed in the field.[20] The data collected for each inventory tree includes, among others: the current work status, tree species, growth rate, height, diameter at breast height (DBH), tree health, clearance, location, customer information, and outage investigations.

[20] SDG&E Opening Brief at 3; Ex. SDG&E-02 (Akau Direct) at 3.

Consistent with SDG&E's approved 2020 WMP and 2021 WMP updates, in 2020 and 2021 SDG&E conducted a second and separate hazard tree patrol in the entire HFTD to further reduce the risk of wildfire due to tree conflicts with the power lines.[21] SDG&E also continued inspecting fast-growing trees and species with high failure potential during this off-cycle patrol, such as Century plant and bamboo. This second patrol was not forecasted in SDG&E's 2019 GRC. Table 4 below shows the increase in the Vegetation Management inventory tree population that was inspected between 2019-2021.

Table 4

Year	Inventory Tree Population
2019	482,266
2020	483,066
2021	504,339

As noted, this pre-inspection work is invoiced entirely on the more expensive, Time and Equipment hourly basis. The pre-inspection activity is too varied to unitize due to the time spent engaging and educating customers, pursuing tree removal authorization permissions, resolving customer concerns, hiking difficult and varied terrain, inspecting newly constructed spans of overhead electrical, and entering tree data. Table 5 below shows the increased hours of pre-inspection at Time and Equipment Hourly rates compared to forecasted have contributed to SDG&E's undercollection.[22]

Table 5

Pre-Inspection Activity	4-year Average (2015-2018)	2019	2020	2021
Hours	82,914	96,124	97,883	99,424

[21] Ex. SDG&E-02 (Akau Direct) at 4-5, 13; Prepare Direct Testimony of Shaun Gahagan on Behalf of SDG&E (December 9, 2022) (Ex. SDG&E-01 (Gahagan Direct)) at 3-5.

[22] SDG&E Opening Brief at 9.

Specifically, the increase in cost associated with Pre-inspection in 2020 and 2021 compared to 2019 was $624,571, and $786,237, respectively.

Once the pre-inspection vendor has completed all the assigned field work, the vendor completes the Work Orders and submits to SDG&E for validation that all work has been completed. The SDG&E Pre-inspection Forester reviews and approves all related invoices. Pre-inspection work is then audited for quality and accuracy of the data. This audit is performed by a separate contracted vendor, *Western Environmental Consultants Inc*., and includes a random sample of all completed pre-inspection work. Failed trees are recorded and corrected by the auditor, and audit results are shared with the pre-inspection vendor and SDG&E for corrective action. The SDG&E Quality Assurance Forester meets with the Pre-inspection management team on an ongoing basis to review the audit results.

Tree Trimming and Removal

Tree trimming and removal activities occur approximately 2-3 months after the pre-inspection activity. SDG&E uses qualified, professional utility line clearance tree trim contractors (in 2020 and 2021 *Davey Tree Surgery* and *Utility Tree Service*) to perform this work in a safe and compliant manner.

As noted, under SDG&E's recordkeeping tree trimming work can include "tree trimming" (routine or enhanced pruning to achieve clearances for safety, compliance and reliability in accordance with regulations); "field memo" (priority pruning or removal to abate a non-compliant or imminent threat to the power lines; "hazard" (a tree that is dead, dying, diseased, or structurally unstable that poses a threat to power lines;" or "removal" (tree is removed down to ground level).

All tree work is performed following industry American National Standards Institute (ANSI) and state and federal Occupational Safety and Health Administration (OSHA) requirements for worker safety and tree health. Like the pre-inspection activity, work is assigned to the tree vendors. The tree vendors create the Dispatch Work Orders for all assigned VMAs and distribute to the tree crews. The tree crews perform the field work and document via the electronic Epoch system within each tree record worked.

SDG&E is responsible for compliance with applicable rules and regulations, including GO 95, Rule 35; Public Resources Code Sections 4292 and 4293, and NERC 18 FAC003-4. Those regulations require a minimum clearance between vegetation and SDG&E facilities.[23] SDG&E instructs its tree contractors to trim trees to at least a 10 feet clearance for safety—or what is required for each tree to maintain the required minimum clearances for at least one annual trim cycle.[24]

Per GO 95, Rule 35, the Commission prescribed that for areas with high fire risk, the recommended post-trim clearance is 12 feet.[25] As part of SDG&E's "Enhanced Vegetation Management Program," which was introduced in SDG&E's 2019 WMP, SDG&E performs greater clearances (12 feet up to 25 feet) on targeted, fast-growing species and trees that exhibit hazardous characteristics that pose a threat to overhead conductors that increase the risk of wildfire.[26] SDG&E's goal was to further reduce vegetation contacts—which are a demonstrated

---

[23] Ex. SDG&E-02 (Akau Direct) at 2.

[24] SDG&E Opening Brief at 3 (citing Ex. SDG&E-02 (Akau Direct) at 3).

[25] Ex. SDG&E-02 (Akau Direct) at 15; Ex. SDG&E-01 (Gahagan Direct) at 3.

[26] SDG&E Opening Brief at 6 (citing Ex. SDG&E-05 (Akau Rebuttal) at 6; Ex. SDG&E-01 (Gahagan Direct) at 1-2).

source of wildfire ignition risk—by increasing post-trim clearances for the five highest risk tree species in the HFTD.[27]

The Commission first approved SDG&E's Enhanced Vegetation Management Program as part of SDG&E's 2019 WMP approval, finding that SDG&E "may implement a 25-foot post-trim clearance where necessary and feasible and if such practice is supported by scientific evidence or other data showing that such clearance will reduce risk under wildfire conditions."[28] The Commission in the 2019 TTBA Decision approved SDG&E's recovering its 2019 TTBA undercollection that resulted, in part, from its Enhanced Vegetation Management Program, finding that SDG&E's enhanced clearance plan was:

- Authorized in SDG&E's WMP, permitting SDG&E to trim to a 25-foot clearance where "necessary and feasible" as supported by data;
- Based upon historical data showing that the vegetation contact rate is reduced for clearances of greater than 20 feet; and that
- SDG&E strategically implemented the 25-foot clearance on a limited basis because it targeted trees deemed to pose the highest risk to electrical infrastructure.[29]

In 2020 and 2021, SDG&E continued to implement its Enhanced Vegetation Management Program to trim trees up to a 25-foot clearance, limiting such a clearance to instances where it would have the biggest impact on reducing risk, as provided for in SDG&E's approved 2020 WMP.[30] SDG&E continued ongoing increases in trees trimmed to a clearance of 12 feet and greater in 2020 and 2021.[31] By contrast, SDG&E did not even forecast trims of up to

---

[28] D.19-05-039, Ordering Paragraph 5 at 29-30.

[29] D.22-03-009 at 22, Findings of Fact (FoF) 12-14.

[30] Ex. SDG&E-01 (Gahagan Direct) at 4 (citing SDG&E's 2020 WMP at 39-40.).

[31] Ex. SDG&E-02 (Akau Direct) at 15; *accord* Ex. SDG&E-05 (Akau Rebuttal) at 8.

25 feet in its 2019 GRC forecast, as SDG&E's WMP-approved Enhanced Vegetation Management Program did not yet exist. Table 6 shows the number of trees trimmed to the greater clearances.

Table 6

Tree Trim Activity	2019	2020	2021
Enhanced Vegetation Management (trees trimmed to clearances > 12 feet)	8,310	17,075	12,578

SDG&E's enhanced clearance policy has thus resulted in a substantial increase in tree trimming costs compared to SDG&E's GRC 2019 authorized forecast, contributing to SDG&E's 2020 and 2021 TTBA undercollections. SDG&E performs a second tree trimming activity annually in the HFTD based on the trees identified for work by the pre-inspection vendor during the off-cycle HFTD patrol. Enhanced clearances that take more time to complete and require additional crew resources may result in increased cost either in fixed unit pricing or higher Time and Equipment hourly rates, as discussed further below.

SDG&E similarly had an increase in hazard tree trimming costs compared to its 2019 GRC forecast to comply with its approved WMPs.[32] Hazard trees are generally dead, diseased, or structurally unsound trees with potential to fall into overhead electric lines.[33] SDG&E again in 2020 and 2021 removed and trimmed significantly more hazard trees than forecasted for SDG&E's 2019 GRC as the result of additional tree audits and inspections.[34] Table 7 shows the number of hazard trees trimmed.

---

[32] Ex. SDG&E-02 (Akau Direct) at 14.

[33] *Id.* at 3; SDG&E Opening Brief at 11-12.

[34] Ex. SDG&E-02 (Akau Direct) at 14; Ex. SDG&E-05 (Akau Rebuttal) at 7-8.

Table 7

Tree Trim Activity	4-year Average (2015-2018)	2019	2020	2021
Hazard Trees	4,737	8,406	8,620	5,259

As noted, while SDG&E has an established contractual rate for hazard tree remediation, Time and Equipment hourly rates may apply if a hazard tree requires more work based on an assessment of safety requirements, site-specific conditions, required time to complete the work, specialized equipment, and other applicable considerations.[35]

Tree Trimming Activity Auditing

Following tree trimming and removal activities, the audit contractor performs a quality assurance activity to ensure work was completed in a compliant manner and in accordance with contractual and regulatory requirements.[36] This audit consists of a random, representative sample of all completed tree trimming and removal work. Any audit tree that does not meet quality or compliant standards is returned to the tree trim vendor to correct the condition at no cost to SDG&E, thus ensuring SDG&E receives all services for which it is billed.

The SDG&E Quality Assurance Forester meets with the tree trimming management team on an ongoing basis to review the audit results. During the post-trim audit activity, the audit vendor concurrently performs an additional patrol of all overhead lines within the VMA to ensure compliance before the next routine-scheduled pre-inspection activity. A second quality assurance activity is performed on all completed tree trimming and removal work identified during the off-cycle HFTD patrol. This includes a 100% assessment of all completed work.

---

[35] Ex. SDG&E-02 (Akau Direct) at 5.

[36] *Id.* at 6.

SDG&E's 2019 WMP revised and increased SDG&E's audit activity to assist in performing "Level-2," hazard tree patrols—meaning a 360-degree assessment of the tree from ground to upper-canopy to identify any hazardous conditions that could pose a threat to the power lines—during HFTD off-cycle patrols in the HFTD.[37] SDG&E's 2020 WMP further increased its auditing scope to include all completed tree pruning and completed hazard and removal work resulting from off-cycle HFTD patrols, resulting in an increase in auditing hours compared to forecasted, as shown in the Table 8 below.[38]

Table 8

Audit Activity	**4-year Average (2015-2018)**	**2019**	**2020**	**2021**
Hours	31,796	36,458	44,129	36,774

The estimated additional cost of the off-cycle Level 2 inspections in 2020 was approximately $310,000, reflecting the trimming and/or removal of an additional 1,767 trees—including 475 hazard trees.[39] In 2021, SDG&E's off-cycle Level 2 HFTD inspections were performed by the audit contractor and the pre-inspection contractor, with an estimated additional cost of approximately $267,000.[40]

Due to this combination of increased inspections, enhanced clearances, additional hazard tree activities, and increased auditing SDG&E had significant increases in the amount tree trimming activity billed under Time and Equipment hourly rates compared to its 2019 GRC forecast, as shown in Table 9 and as discussed further below. SDG&E Response to Question 2(d):

SDG&E is providing the five (5) highest dollar value invoices for each month and the associated document(s) that support the invoice for expenses that were recorded to SDG&E's TTBA for 2020-2021 via the Commission's Kiteworks system. Most of the highest dollar invoices are associated with the high-volume (number of units) annually scheduled trimming/removal operations within an individual VMA. The tree vendor generally invoices monthly; therefore, each invoice may represent work on more than a thousand trees.

Other sources of high-dollar invoices are associated with hourly work such as priority field memos. Those are usually issued off-schedule and, therefore, invoiced at a higher cost. These documents, in their entirety, are Confidential and protected materials pursuant to Public Utilities Code Section 583, Decision ("D.") 06-06-066, D.21-09-020, and D.14-10-033, and General Order 66-D (Rev. 2). Please note that the invoices may show both distribution and transmission work and cost—even though SDG&E is only requesting the recovery of undercollected distribution costs in the proceeding—because vendors may perform work on activities that have both a distribution and transmission component. These activities and costs are tracked in SAP by the internal order number (#6010250 = Distribution/ #6013465 = Transmission).[42]

See also Attachment A, titled "Transaction Detail – Tree Trimming (TT) 2020 2021" (Transaction Detail Report), tab titled: "Top 5 Invoices per month," showing a summary list of the

[42] *See* SDG&E Reply Brief at 7.

five (5) highest dollar value invoices for each month in which expenses were recorded to SDG&E's TTBA for 2020-2021. The Transaction Detail Report sheet attachment contains Confidential and protected materials pursuant to Public Utilities Code Section 583, Decision ("D.") 06-06-066, D.21-09-020, and D.14-10-033, and General Order 66-D (Rev. 2).

Question 3:

A recorded cost per unit of work for each line item (e.g., cost per tree removed; cost per tree inspected; cost per tree trimmed).

SDG&E Response to Question 3:

Please see Attachment B, titled, "Contractual Rate Comparison 2017-2021.Response.Q3.Confidential," which shows the contractor rates in 2017 through 2019 and the actual contractor rates for 2020 and 2021. This pdf attachment contains Confidential and protected materials pursuant to Public Utilities Code Section 583, Decision ("D.") 06-06-066, D.21-09-020, and D.14-10-033, and General Order 66-D.

The recorded cost per unit of work for each activity is provided in the invoices in response to 2(d). As described in response to question 2(a), SDG&E records the cost per unit of work only for tree trimming and removal activities performed under fixed pricing. SDG&E does not record cost per unit of work for tree trimming and removal activities performed under hourly Time and Equipment rates. As discussed, SDG&E had a significant increase in the use of hourly Time and Equipment rates due to the increase in tree trimming activities resulting from SDG&E's approved WMPs and the shortage of qualified contractors due to the overall increase in California for wildfire mitigation activities. As seen in the documentation, SDG&E also had a significant increase in all tree trimming rates due to the implementation of SB 247 in January 2020.

Question 4:

Why these activities were reasonable and appropriate for TTBA recovery and how SDG&E effectively managed TTBA costs.

SDG&E Response to Question 4:

SDG&E's tree trimming activity and resulting undercollections in its TTBA for 2020 and 2021 are primarily caused by, and reasonably incurred for:

- Expanded tree trimming inspections, enhanced vegetation management clearances, removals, and auditing to achieve critical wildfire mitigation goals as described and approved in SDG&E's 2019 WMP and subsequent updates; and
- The passage of SB 247 in 2020, which significantly increased contractor union labor wages and benefits.[43]

In other words, SDG&E's 2020 and 2021 TTBA undercollection was reasonably driven by increased inspection, trimming, and removal efforts to comply with SDG&E's approved WMPs to reduce the likelihood of a catastrophic wildfire, combined with higher labor costs to perform that increased work compared to the costs that were forecasted in SDG&E's 2019 GRC, which was based on historical costs for the period 2013-2016. These factors are interrelated. SDG&E is conducting more TTBA-related activities than forecasted in SDG&E's 2019 GRC to comply with SDG&E's approved-WMPs.

These expanded, more comprehensive, and more difficult activities are requiring the use of a greater amount of Time and Equipment hourly rates, which are more expensive than fixed rates. SDG&E's increased tree trimming activities occurred at the same time that all electrical corporations in California expanded their tree trimming activities. This resulted in a shortage of qualified tree trimmers, increasing SDG&E's need to use Time and Equipment hourly rates to

[43] SDG&E Opening Brief at 7-21; SDG&E Reply Brief at 2-5.

attract tree trimmers to ensure that the work was completed on time to reduce wildfire risk. The need for increased contractor hours was further exacerbated by SB 247's passage, which increased the cost of tree trimming labor.

SDG&E's incremental tree trimming costs for 2020 and 2021 were unforeseeable in SDG&E's 2019 GRC forecast because they principally arise from the subsequent adoption of SDG&E's WMPs, the resulting increased need for hourly rates, and passage of SB 247. This O&M undercollection was thus reasonably incurred and SDG&E should obtain recovery. Yet SDG&E consistently strives to effectively manage tree trimming costs through competitive bidding with approved, qualified contractors, limited and targeted enhanced tree trimming, and annual audits. As noted, no party to this proceeding has challenged the reasonableness of SDG&E's tree trimming activities that led to its TTBA undercollection.

Table 10 and Table 11below show the cost increases for its tree trimming and associated activities compared to SDG&E's 2019 GRC forecasted average. As noted, although T&E makes up the majority of the undercollection, this is an artifact of SDG&E's tree trimming record-keeping for tree trimming. As discussed, all trimming or removals that required hourly rates are captured under T&E regardless of the specific activity. In other words, SDG&E's WMP-required Enhanced Vegetation Management Program of clearances up to 25 feet and increased hazard tree management more frequently required Time and Equipment hourly rates, which is reflective of those rates being used 113% more in 2020 and 40% more in 2021 compared to forecasted.

SB 247's impact is also seen in that T&E figure. While the count of Time and Equipment hours were 113% and 40% respectively, the *cost* of those hours were 242% and 114% higher compared to forecasted—around a five-fold increase in 2020.

Table 10
2020 Tree Trimming Activities[44]

Activities - units of measure	4-year Average (2015-2018)	2019 Cost	2019 Counts	2020 Cost	2020 Counts	Cost Difference	Count Difference

A. SDG&E's 2020-2021 TTBA Undercollection Reasonably Arose from SDG&E's Expanded Tree Trimming Wildfire Mitigation Activities in Accordance with SDG&E's Approved WMPs

As noted, in response to the state's catastrophic wildfires,[45] the Commission approved SDG&E's first SB 901-mandated WMP for 2019, substantially increasing SDG&E's "vegetation

[44] In granting SDG&E cost recovery for its 2019 TTBA undercollection, the Commission found that, "[e]xcept for the costs of customer refusals, SDG&E provided the specific amount of costs it spent for each specific vegetation management activity." D.22-03-009 at 19-20. Similarly, here, SDG&E has categorized its 2020 and 2021 tree trimming expenses by tree trimming area and compares them to SDG&E's 2019 GRC forecasted average in these tables. *See* SDG&E Reply Brief at 6.

[45] *See* D.19-05-039 at 2 ("Catastrophic wildfires have devastated California in recent years.").

management efforts to mitigate wildfire risks" and reduce the need for Public Safety Power Shutoff (PSPS) events [46]

As discussed in response to 2(d), WMP-required efforts result in significantly increased tree trimming activities and costs compared to what was forecasted in SDG&E's 2019 GRC, including an increase in:

- Inspections, such as conducting a second and separate hazard tree patrol in HFTDs to further reduce the risk of wildfire due to tree conflicts with the power lines;[47]
- Expanded post trim clearances to higher risk species of up to 25 feet where deemed necessary and feasible under SDG&E's Enhanced Vegetation Management Program;[48]
- Hazard tree abatements; and
- Post-trim audits, including "Level-2," hazard tree patrols and an audit of all completed tree pruning and completed hazard and removal work resulting from off-cycle HFTD patrols.

As noted, SDG&E's 2019 WMP was approved by the Commission in D.19-05-039. There, the Commission:

- Observed that SDG&E states that it places importance on the HFTD by performing more frequent inspections and expanding its tree-trim scope there;"
- Noted that SDG&E had "historically used a contractor workforce to perform the vegetation management program activities of tree pre-inspection, tree pruning and removal, pole brushing, and quality assurance;"[49] and that

---

[46] D.22-03-009 at 4; *see* Ex. SDG&E-02 (Akau Direct) at 4

[47] Ex. SDG&E-02 (Akau Direct) at 4-5, 13; Ex. SDG&E-01 (Gahagan Direct) at 3-5.

[48] Ex. SDG&E-05 (Akau Rebuttal) at 6 (citing Ex. SDG&E-01 (Gahagan Direct) at 1-2).

[49] D.19-05-039 at 8-10.

- "There are circumstances where a 25-foot post-trim clearance is feasible and necessary,"[50] even though it was more than double the 12-feet standard for clearance.

The Commission's Wildfire Safety Division and its successor, the Office of Energy Infrastructure Safety (Energy Safety), likewise reviewed and approved these initiatives in SDG&E's 2020, 2021, 2022, and 2023 WMP updates. As Energy Safety found in its 2023 WMP Decision approving SDG&E's WMP:

- SDG&E is "relatively strong" in its vegetation management;[51]
- "[r]egarding vegetation management, SDG&E has the lower number of vegetation-caused ignitions and outages per 10,000 overhead circuit miles among the large electric corporations;" and
- "SDG&E conducts a robust, annual inspection of vegetation adjacent to its assets," where this "high level of frequency and granularity ensures outages and ignitions from vegetation contact are minimized."[52]

In D.22-03-009, the Commission approved SDG&E recovering its 2019 TTBA undercollection based, in part, on the Commission finding that it was reasonable for SDG&E to incur higher TTBA costs then forecasted in SDG&E's 2019 GRC to comply with SDG&E's subsequently established WMP. As the Commission found, it was "reasonable for SDG&E to recover the costs it spent on the Enhanced Vegetation Management program," and that "SDG&E incurred hazard tree costs reasonably and should be allowed to recover those costs."[53] In reaching these determinations the Commission found that:

---

[50] *Id.* at 25, FoF 3.

[51] Energy Safety, Decision on 2023-2025 Wildfire Mitigation Plan, SDG&E (Oct. 13, 2023) at 1, Executive Summary, available at https://energysafety.ca.gov/what-we-do/electrical-infrastructure-safety/wildfire-mitigation-and-safety/wildfire-mitigation-plans/2023-wildfire-mitigation-plans/.

[52] *Id.* at 1, 58.

[53] D.22-03-009 at 24, Conclusions of Law 3 and 4.

- "The increased hazard tree activities (e.g., tree audits, inspections, trims, and removals) SDG&E performed were necessary to meet the objectives set forth in its WMP and to ensure safe operations of its facilities;"

- "D.19-05-039 permitted SDG&E to implement the 25-foot clearance where necessary and feasible if such a practice is supported by scientific evidence or other data showing that such clearance will reduce risk under wildfire conditions;"

- "SDG&E used historical data to strategically implement the 25-foot clearance on a limited basis in 2019, targeting situations which data has shown pose the highest wildfire risk, specifically for HFTDs and for specific tree species that have historically been prone to failure (e.g., cause ignitions);" and that

- "SDG&E's data shows that the rate of vegetation contacts reduces with increased clearances, with the greatest rate reduction for clearances of greater than 20 feet."[54]

Those Commission findings regarding SDG&E's TTBA undercollection being reasonably incurred due to enhance vegetation management activities to comply with SDG&E's approved WMPs are equally applicable to 2020 and 2021. That is, the same factors that led to SDG&E's TTBA undercollection in 2019 are what led to SDG&E's 2020 and 2021 undercollections, as reflected in the increased inspections, audits, tree trimming, and removals compared to what was forecasted in SDG&E's 2019 GRC.

Moreover, SDG&E has since further demonstrated the effectiveness of its Enhanced Vegetation Management Program in reducing tree-related outages, damage claims, and ignitions.[55] Specifically, SDG&E's Third Quarterly Report addressing SDG&E's 2020 WMP demonstrated that, by expanding clearances from 10-12 feet to the enhanced clearance levels for

---

[54] *Id.* at 22-25, FoF 10-14.

[55] Ex. SDG&E-01 (Gahagan Direct) at 6-11; Ex. SDG&E-05 (Akau Rebuttal) at 8.

the five identified tree species, annual contact rates with power lines move from 0.18 per thousand trees to 0.05 per thousand trees.[56]

Again, because the Enhanced Vegetation Management Program was implemented in 2019, it was not a component of SDG&E's original GRC forecasts for 2019.[57] As noted, no party has challenged the reasonableness of these activities. And SDG&E must perform these activities to comply with its approved WMPs, rendering the recovery of SDG&E's undercollection reasonable.

B. SDG&E's Compliance with its Approved WMPs Required a Significant Increase in Time and Equipment Hourly Rates

Because of these WMP-approved increased inspections, additional hazard tree activities, and its Enhanced Vegetation Management Program, SDG&E experienced significant increases in the use of Time and Equipment hourly rates applied to tree trimming activity rather than Fixed Pricing (see response to Question 3 for detailed description of Time and Equipment vs. Fixed Pricing rates) compared to 2019 four-year GRC forecast.[58] As explained in response to Question 2a, Time and Equipment hourly rates always apply to inspections and audits. And they are approved and applied to more complex or difficult projects. Because SDG&E's enhanced vegetation management from its approved-WMPs required more difficult and complex jobs such as the removal of more hazard trees, emergency trims to avoid imminent danger, and/or greater clearances to meet SDG&E's enhanced vegetation management efforts, SDG&E had to incur more Time and Equipment and Fixed Pricing rates for these more difficult and/or expanded jobs.

---

[56] Ex. SDG&E-01 (Gahagan Direct) at 6-7 (citing SDG&E's Quarterly Report on 2020 WMP for Q3 2020 (Sept. 9, 2020), Section III.L at 125-129 and Appendix B.).

[57] Ex. SDG&E-01 (Gahagan Direct) at 1-2; Ex. SDG&E-02 (Akau Direct) at 15; Ex. SDG&E-05 (Akau Rebuttal) at 6.

[58] Ex. SDG&E-02 (Akau Direct) at 17; Ex. SDG&E-05 (Akau Rebuttal) at 4.

As discussed, Tables 10 and 11 above show that SDG&E's 2020-2021 undercollection was largely driven by Time and Equipment hourly rates for tree trimming and removals, which more than tripled in 2020 and more than doubled in 2021 compared to SDG&E's 2019 GRC forecasted 4-year average for 2015-2018.[59] As noted, Time and Equipment Hourly rates are more expensive than fixed rates. Time and Equipment rates always apply to pre-inspection and auditing activities due to the difficulty and varied nature of the work.

Similarly, the more difficult the tree trimming task, the more likely it is to be converted to hourly rates. Again, SDG&E's Time and Equipment undercollection compared to forecast captures all tree trimmings and removals that SDG&E paid for hourly rather than with a fixed cost. In Table 12 below, SDG&E estimated the number of tree trimmings and removals where Time and Equipment hourly rates applied assuming a standard 2-man crew hour rate for each year to calculate an estimated cost for those number of trees trimmed or removed on Time and Equipment hourly rates trees for 2020 and 2021.[60]

Table 12

Tree Trimming Activity (units)	4-year Average (2015-2018)	2019	2020	2021
T&E (hours)	40,798	67,812	144,386	94,882
Estimated units	not available	not available	76,107	35,030
Estimated average cost per tree trim		not available	$380	$581
Estimate cost standard 2 man crew		not available	$28,905,439	$20,334,915

This increased use of Time and Equipment hourly rates reflects the expansion of SDG&E's tree trimming and removals under SDG&E's approved WMPs. That is, SDG&E mandate to increase the number of enhanced clearances in high-risk areas to meet its Enhanced

[59] *See* SDG&E Opening Brief at 13-14; SDG&E Reply Brief at 3.

[60] The remaining T&E costs in the years 2020 and 2021 are estimated to be non-labor cost related to cost for landfill fees, tree replacements, traffic control, specialized equipment, etc. in the SAP CCMS invoice attachments being provided in Question 2d.

Vegetation Management Program—which can require more time, effort, and crews—and the increased removal of hazard trees correspondingly increased the amount of Time and Equipment hourly rates that had to be used for tree trimming and removal.

Moreover, the demand for qualified, professional tree trimmers significantly increased as electric utilities throughout the state increased their vegetation management activities, resulting in a shortage of Certified Arborists and Utility Line Clearance Arborists to perform these activities. SDG&E thus had to increasingly use Time and Equipment hourly rates to meet SDG&E's need for its WMP-approved tree trimming activities described above in a timely fashion to prevent an increase in the risk of ignition.

To that end, in 2020 and 2021, SDG&E's tree trimming contractor, *Utility Tree Service,* utilized a subcontracted workforce to augment its local tree crews to address the increase in critical tree trimming and removal work for safety, compliance, and reliability. All work completed by the subcontractors was billed under Time and Equipment rates as agreed upon by SDG&E and the vendor. Subcontracted costs for this work also included associated per diem and lodging expenses in addition to the hourly rates in the effort to continue operations unabated.

And beginning in early 2020, the California investor-owned utilities and contractors were also impacted by restrictions associated with the COVID-19 pandemic. This stressed contractors' ability to maintain a stable and consistent workforce and negatively impacted overall operations by preventing in-person communications with customers to access properties and trim trees. It increased the time to perform tree trimming and removals to comply with COVID-19 protocols. As such, SDG&E had to more frequently apply Time and Equipment hourly rates rather than Fixed Pricing (see response to Question 3 for detailed description of Time and Equipment vs.

fixed pricing rates) to compensate for the added crew time to safely perform enhanced tree trimming.

In the 2019 TTBA Decision, the Commission allowed all Time and Equipment costs (except the cost of customer refusals, which SDG&E is not seeking here), finding that "[t]he vegetation management work was necessary for SDG&E to maintain safe and reliable operations, as well as to safety and compliance obligations."[61] So too here, SDG&E's use of Time and Equipment hourly pricing was necessary to comply with SDG&E's enhanced tree trimming activities from SDG&E's approved WMPs. California utilities competed for the same tree trimming labor created by their enhanced vegetation management activities state-wide, creating increased demand for a limited supply of workers.

C. SB 247 Further Increased Labor Costs

A separate major cost driver for all tree trimming activities in 2020 and 2021 that arose after 2019 was the passage of SB 247, which went into effect on January 1, 2020.[62] As noted, this legislation sought to achieve greater parity in wages and benefits for qualified tree trimmers with other electrical workers[63] and resulted in a significant increase in annual contractual rates for tree trimming.[64]

As Resolution E-5287 recently found, "SB 247 mandates the payment of at least the prevailing wage rate for all qualified line clearance tree trimmers, not just ones performing work in high-fire risk areas."[65] SB 247 also reclassified overtime time-and-a-half to double-time, with

[65] Resolution E-5287 at 3.

all workers receiving a daily per diem stipend.[66] The overtime recorded in 2020 was associated with non-unionized costs. All per diem costs in 2021 are integrated within the regular and hourly rate structure and, therefore, not reflected in Table 13 below as a separate, trackable cost.[67]

Table 13

Year	Overtime	Double-time	Per Diem
2019	$187,401	$16,964	$53,395
2020	$13,640	$4,600,372	$1,490,750
2021	$0.00	$1,752,169	$0.00

Although SDG&E's tree trimming costs would have increased in 2020-2021 due to the wildfire mitigation and enhanced reliability work described above, SB 247 had a simultaneous and compounding effect of increasing the costs to perform the workload.[68] As noted, this is reflected in Table 13 above. While the amount of Time and Equipment hours needed for tree trimming and removals were 113% and 40% higher respectively than forecasted, the *cost* of those hours were 242% and 114% higher compared to forecasted. As the Commission found in Resolution E-5287, "the increase in labor costs for vegetation management activities in 2020 are in part the result of an exogenous event, namely the Legislature's passage of SB 247[] . . . and its requirements that cause labor costs for vegetation management activities to increase."[69] This rationale applies equally here, and contributed to actual contractor rates for 2020 and 2021 that were significantly higher than 2017 and 2018 rates, contributing to SDG&E's TTBA undercollection (*See* Attachment B provided in response to question 3 above).

68 *Id*.

69 Resolution E-5287 at 10.

SDG&E's TTBA undercollection for 2020-2021 was thus reasonably incurred. Again, no party is challenging the reasonableness of SDG&E's WMP that has required a significant increase in tree-trimming activities. Instead, SDG&E has been repeatedly lauded for its vegetation management practices by both the Commission and Energy Safety. The Commission permitted SDG&E recovery of its 2019 TTBA undercollection that resulted from SDG&E's same WMP-approved tree trimming activities. There is no basis for a different result here.

Similarly, as in Resolution E-5287, SDG&E was obligated to comply with SB 247's requirements, making the recovery of SDG&E's undercollection for these labor rate increases reasonable.[70] And as in the 2019 TTBA Decision, SDG&E's increased use of Time and Equipment hourly rates was necessary to effectuate SDG&E's required WMP-activities that the Commission has found reasonable. As noted, no party introduced evidence or attempted to argue that SDG&E should not have taken the WMP actions in question. Nor has any party asserted that SDG&E should not have incurred the labor costs that it did. To find that SDG&E's increased costs due to the need for increased hourly contracting to accomplish those WMP-requirements would amount to a finding that those WMP efforts were not reasonable years after the fact and leave SDG&E in a position where its regulatory agencies have mandated that it take actions without the ability to recover for those activities.

D. SDG&E Effectively Manages Its Tree Trimming Costs

Although SDG&E's tree trimming costs exceeded its 2019 GRC forecasts due to the unforeseen events of the creation of utility WMPs and the passage of SB 247 that SDG&E must comply with, SDG&E has consistently sought ways to manage the tree trimming cost reasonably and appropriately leveraging its competitive fixed pricing structure to keep costs low and

[70] Ex. SDG&E-02 (Akau Direct) at 19.

minimize cost fluctuations. SDG&E consistently strives to effectively manage tree trimming costs through competitive bidding with approved, qualified contractors, limited and targeted enhanced tree trimming, and annual audits.

The Commission found in SDG&E's 2019 TTBA Decision that SDG&E's Enhanced Vegetation Program was "limited in scale and used historical data to target high risk conditions."[71] That remained the case in 2020 and 2021. SDG&E limited the scope of enhanced clearances to places where it would have the biggest impact on reducing risk, targeting the five species of trees that were the biggest threat to infrastructure, and applied a targeted approach to clearance chosen as determined by the arborist based upon the individual tree's characteristics.[72]

SDG&E engages contractors annually on current rate structure and requires justifications for changes. SDG&E also negotiates competitive, long-term pricing agreements with approved, qualified contractors to keep prices reasonable and reflective of a competitive market. While SB247 increased SDG&E pricing structure significantly in 2020 and 2021, SDG&E leveraged the best rates possible to keep cost reasonable.

The SDG&E Area Foresters directly manage the work performed by the tree trimming contractors, including tracking assigned work, completion dates, and schedule status. The Area Foresters also assists in securing any necessary permits to perform work, coordinates city and agency notifications, environmental reviews, and manages customer refusals with the vendors. Upon completion of all assigned work within a VMA, the tree vendors submit a VMA certification report validating that all work has been completed. The certification report identifies all deferred work such as customer refusals, and exceptions related to environmental holds or

---

[71] D.22-03-009 at 11.

[72] Ex. SDG&E-01 (Gahagan Direct) at 4 (citing SDG&E 2020 WMP at 39-40).

access restrictions. Refusals and exceptions are documented separately and reissued for work when the issue has been resolved.

The tree trimming vendors invoice all completed work within the CCMS system daily, weekly, or monthly based on whether the assigned work was routine or priority. The SDG&E Area Forester reviews all submitted invoices for accuracy and completeness including validation of assigned units, associated cost of services, and accuracy of supporting documentation.

Additionally, SDG&E's corporate parent, Sempra, performs annual audits to verify that vegetation management work activities and accounting processes comply with regulatory and internal company requirements and identify possible areas for process improvements where applicable.[73]

Question 5:

Provide an update of SDG&E's progress on tracking accounting of tree-trimming costs, including upgrades to its EPOCH system, to better track TTBA costs.

SDG&E Response to Question 5:

SDG&E continues to seek ways to improve its TTBA cost tracking practices. Regarding Epoch, SDG&E has recently upgraded the Epoch system to include new data fields to designate trees that are worked under Time and Equipment rates, the type of tree crew, and the aggregated crew hours to perform the hours, better isolating cost information for reporting. SDG&E is currently in the process of integrating these upgrades within Epoch into the design and development for isolating costs at the asset and activity level.

In addition, SDG&E has completed efforts to restructure its contracts at the purchase order phase to better track cost by tree trimming activity. And SDG&E has also enhanced

[73] Ex. SDG&E-02 (Akau Direct) at 6.

financial tracking of tree-trimming/removal costs, enabling detailed reporting for each tree record and activity level. These improvements will help isolate specific costs associated with the multitude of tree trimming and removal activities. The programs to perform these calculations are ongoing and expected to be completed and tested by the first quarter of 2024.

Question 6:

Provide an update on any other measures that SDG&E has taken to track TTBA costs more granularly, including subcategorization of discrete activities.

SDG&E Response to Question 6:

In addition to the information provided in Question 5, SDG&E hired one Senior Data Analyst in Q3, 2021 to assist in cost tracking, reporting, and forecasting. In 2023, in the effort to develop improved forecasting and modeling of work activities and cost, SDG&E hired a Principal Analyst to assist with the complexities and dynamics of the vegetation work activities and invoicing. The cost of these two additional analysts is about $260,000 annually.

Respectfully submitted,

/s/ Ross Fulton
