

**SUNRISE POWERLINK:
FINAL – Response to Non-Compliance Report #2
Violations of Peninsular Bighorn Sheep Construction Monitoring Plan**

Corps of Engineers File Number: SPL-2007-00704-SAS
State Water Resources Control Board File Number: SB09015IN
Department of Fish and Game Notification Number: 1600-2009-0365-R5

Date Filed:	11.3.2011		
Preliminary Notification Date	10.27.2011		
Date/Time of Event:	Various		
Event Location	Mountain Springs Grade		
Reported by:	Robert Jackson General Manager and Director – Construction and Engineering Sunrise Powerlink 1010 Tavern Road; Alpine, CA 91901 – SD1116 rcjackson@semprautilities.com		
Originator/Reporter:	Cassandra Garza CPUC EM

<p>Type of Project Impact Associated with incident</p>	<p> <input type="checkbox"/> Permanent impact <input type="checkbox"/> Temporary impact <input checked="" type="checkbox"/> Other (None. Although helicopters and crews were out of compliance with mitigation measures, no PBS were harassed, harmed, or injured as a result of the activities.) </p>
<p>Injuries or Property Damage</p>	<p>No</p>
<p>Cited Permit/ Mitigation Measure</p>	<p>MM B-7c SS-CM-16 SS-CM-18 PBS Construction Monitoring Plan</p>
<p>Compliance Level</p>	<p>Level 2</p>
<p>Corrective Action(s)</p>	<p>SDG&E takes this event very seriously and is committed to staying in compliance. The following corrective actions have occurred:</p> <ol style="list-style-type: none"> 1. On Thursday, October 27, an environmental stand down was held with some of the Project pilots. 2. On Friday, October 28th, an environmental stand down was held for all crew members and project personnel. During the stand down, SDG&E and PAR management, along with the PBS biologist, addressed the importance of protecting the PBS, the crew's responsibilities under the law, and the Project mitigation measures. The previous infractions leading up to the NCR were discussed, and the consequences of these actions were explained, in detail, along with the new procedures to prevent further incursions. A Question & Answer session was also held to help address any lingering questions or additional clarifications. 3. The two yards located in PBS habitat, AER and Fromm, will no longer be used as tailboarding or initial meeting points. Crews working in PBS territory will show up at either the S2 Yard or the Jacumba Valley Ranch (JVR) Yard. Crews will not be allowed to leave the yards and enter PBS territory until the clearance has been granted by the PBS monitors. 4. Yard monitors will be responsible for communicating with Sunrise Base and giving the "all clear" to crews waiting in the S2 and JVR Yards. 5. Security guards/traffic control will be posted in strategic areas to stop anyone attempting to enter the PBS areas prior to clearance. 6. Hardhat stickers will be printed to allow yard monitors to easily identify individuals who are and are not properly trained to work in PBS habitat. Anyone found at tailboards without the proper

	<p>training will attend a training in the construction yards at that time and prior to entering PBS habitat.</p> <ol style="list-style-type: none"> 7. Helicopter operations will strictly follow the approved flight corridors and flight restrictions shown in their Garmin GPS units. 8. The role of Sunrise Base in addressing changes to the work site, i.e., when PBS move into the work area buffer zone, has been reviewed with monitors, crew members, and pilots. Crews were directed to coordinate with Sunrise Base for any questions regarding clearance status, change in clearance status, and evacuation procedures in the event that work must stop with the presence of PBS. 9. All crews and pilots were informed that a violation of the PBS protocol may constitute grounds for termination of the offending individual(s), in addition to the larger consequences that could be applied to the Project as a whole and, subsequently, all crew members.
<p>Follow-up Required</p>	<p>No further action required.</p>
<p>Attachments</p>	<p>Talking points for PBS retraining sessions. Retraining session sign-in sheets.</p>
<p>Detailed Description of Event:</p>	<p>San Diego Gas & Electric Company (SDG&E) is in receipt of Sunrise Powerlink Transmission Project (Project) Non-Compliance Report (NCR) Number 2.</p> <p>NCR Number 2, issued on October 27, 2011, states the following:</p> <p>Repeated violations of the Peninsular Bighorn Sheep (PBS) Construction Monitoring Plan (CMP) by SDGE and their contractor took place on October 18, October 19, October 20, October 24, October 25, and October 27, 2011. On October 18, 2011, a delivery truck entered the EP303/304 area prior to receiving clearance by the PBS monitor. Since, a PBS ram was noted in the vicinity of EP303-306 area on October 10, 2011, this area is subject to all avoidance measures within the CMP. On October 19, 2011, Helicopter N118MB was noted to have operated twice outside of the cleared flight corridor. Also on this date, Helicopter 411MB was noted to have been operating less than 0.6 miles of the PBS perennial water source. On October 20, 2011, Helicopter N118MB was noted to have operated outside of the cleared flight corridor. On October 24, 2011, a worker bypassed the onsite biologist stationed at the kiosk between Fromm and AER, and entered the Fromm yard prior to PBS monitor clearance. Although he was turned around by the security guard upon entering the yard, the</p>

measures installed following PM#7 failed to ensure compliance. On October 25, 2011, Helicopter N127DE was noted to be flying low over AER and Fromm yards prior to the clearance of the area by PBS monitors. On October 27, 2011, crews entered EP303 prior to PBS monitor clearance.

SDG&E takes the issuance of this and any non-compliance very seriously. We have conducted an investigation to determine the appropriate corrective actions to prevent any reoccurrence of violations in PBS habitat. Below is a synopsis of the issues presented by these incidents of non-compliance and the steps that SDG&E has and will take to further ensure compliance with PBS protection.

Issue 1 – Crews are to be IMMEDIATELY retrained on the PBS CMP. Workers not retrained on the elements of the PBS CMP should not be allowed to re-enter identified PBS areas until they have received such training:

At 4:00 PM on Thursday, October 27, 2011, all SDG&E pilots flying in PBS habitat attended a retraining session at Rough Acres Ranch Construction Yard.

At 5:39 PM on Thursday, October 27, 2011, the resource coordinator sent a global message to all personnel who receive the daily schedule advising them that all personnel working in PBS habitat were required to attend a mandatory training at 7:00 AM the following morning at Rough Acres before they could proceed with work in the PBS habitat area (EP256 – EP281, EP290 – EP294, and EP300 – EP312).

Retraining sessions were held on October 27, October 28, October 31, November 1, and November 2, 2011.

Issue 2 – Provide documentation on those who have been retrained:

Appendix 1 to this form includes the sign-in sheets for these mandatory retraining sessions held on October 27, October 28, October 31, November 1, and November 2, 2011. Additional refresher training and training for anyone new to the Project will occur as required. Sign-in sheets will be available on request by the CPUC or BLM.

Issue 3 – How SDG&E plans to prevent further incidents similar to those noted from recurring:

Please see Corrective Actions above.

SUNRISE POWERLINK™

Confirmation of Receipt	If you acknowledge receipt of this form and no further action is needed, please retain for your records. If, however, you would like additional information to determine regulatory action needed, please contact Rachel Romani Briles, SDG&E, Environmental Compliance Project Manager, Sunrise Powerlink Project: 858-636-6865 (office) 858-750-0754 (cell) rromani@semprautilities.com

PBS Training Talking Points

- We are having a retraining on PBS due to some recent non-compliances in the PBS area.
- There were several helicopters that left the corridor, flew too low over the watering hole, or flew into an area below 1500 feet prior to clearance from Sunrise Base. In addition, we have had several incidents of ground crews or personnel entering the PBS area prior to clearances.

- As part of our ability to work in PBS habitat SDG&E had to get a Construction Monitoring Plan approved by the wildlife agencies.
- The following requirements will ensure compliance with the plan. If we can't follow these requirements, work will be stopped in PBS habitat.
- PBS habitat is EP256 thru EP281, EP290 thru EP294, and EP300 thru EP312 including all pull sites, access roads, Old Hwy 80 in the grade, and the Fromm and AER Yards.
- Ground and air crews must monitor their radios in the morning and listen for the clearances.
- If they aren't 100% positive that it is clear, then they must call Sunrise Base to request clearance.
- Clearance is required for ALL areas inside PBS habitat.
- Either prior to the flight clearance, or if they leave the flight corridor, helicopters must be at 1500 feet AGL, unless they are over the watering hole where they must be 3600 feet AGL.
- Pilots must observe all no fly zones shown in the Garmin, no fly zones must be respected.
- If you must leave the corridor for an imminent safety issue, you must immediately call Sunrise Base and self report.
- If any closures of areas or sites within PBS habitat occur during the day due to sheep moving near the alignment, Sunrise Base will make notification and give direction to the pilots and crews. All closures from Sunrise Base must be obeyed.
- Ground crews must be at least 500 feet from any sheep.
- Not following these requirements may be grounds for termination from the Project.

**Sunrise Powerlink Transmission Project
Special Refresher Training
Peninsular Bighorn Sheep (PBS)
Certification of Completion**

By signing below, I certify that I have completed the refresher training for the PBS Construction Monitoring Plan prior to resuming work in the PBS habitat.

I, the undersigned individual, understand the protective measures and restrictions in effect in the Project area and agree to comply with the provisions of the training program. I am aware that I may incur civil and/or criminal penalties if I do not abide by the required measures. Furthermore, I agree to notify an environmental monitor if I observe the species.

POWERLINK™

**Sunrise Powerlink Transmission Project
Special Refresher Training
Peninsular Bighorn Sheep (PBS)
Certification of Completion**

By signing below, I certify that I have completed the refresher training for the PBS Construction Monitoring Plan prior to resuming work in the PBS habitat.

I, the undersigned individual, understand the protective measures and restrictions in effect in the Project area and agree to comply with the provisions of the training program. I am aware that I may incur civil and/or criminal penalties if I do not abide by the required measures. Furthermore, I agree to notify an environmental monitor if I observe the species.
