November 7, 2022

Dear Resident or Property Owner:

San Diego Gas & Electric Company's highest priority is providing you with safe and reliable natural gas and electric service. As part of our commitment to you, we periodically need to make improvements to our facilities within your community to enhance system reliability.

You should have received a notice in August letting you know that the next phase of the Del Mar Reconfiguration Project (Project) would begin shortly. This Project will enhance the reliability and capacity of the local electric transmission and distribution as well as reduce environmental impacts in the coastal wetlands. This notice is to inform you that construction activities will begin approximately the week of November 14th.

Construction includes the reconfiguration and removal of the transmission line that extends from the Del Mar Substation on Via de la Valle, continuing south on Jimmy Durante Boulevard through the San Dieguito Lagoon into Del Mar Heights. It will include the permanent removal of transmission poles and conductor in the lagoon.

This Project also includes placing the overhead distribution line along San Dieguito Drive and Racetrack View Drive underground. Construction activities associated with the conversion of existing distribution circuits from an overhead to an underground configuration will involve trenching, installation of underground vaults and cable, installation of four distribution poles, overhead wire work and paving. San Dieguito Drive traffic will be managed per the traffic control permit. SDG&E® is currently not proposing to close any streets, so residents will have access to their homes.

Construction is expected to be complete in the third quarter 2023. All work activities will take place 7 am – 7 pm, Monday to Friday. Traffic control measures will be in place during construction.

Traffic delays and temporary lane closures are expected. We plan to have traffic control measures in place during construction, and our crews will strive to minimize any impacts to you and your neighbors. We encourage you to adjust commuting plans as necessary.

Location:	City of Del Mar & City of San Diego
Work Days:	Monday - Friday
Hours:	7:00 a.m. – 7:00 p.m. (unless otherwise allowed by permits)
Duration:	Approximately 9 months

Construction activities may take place in phases. This means work along the route will often occur intermittently and all construction activities required in a certain area will not be completed concurrently. Also, there will be multiple construction locations and activities taking place simultaneously, with work hours, traffic control measures, and noise restrictions for each area established by local jurisdictions. Please note, construction dates are subject to change according to compliance requirements, inclement weather, or other unforeseen circumstances. We'll provide additional updates should construction dates change.

Helicopters and/or drones may be utilized for construction, inspection and support activities. The use of helicopters and/or drones may temporarily increase local noise levels, dust, and other disturbances. Should helicopters or drones be needed during construction, SDG&E will endeavor to minimize the impact of aerial operations. Noise and dust disturbances may increase due to construction activities. To reduce possible disturbance during potential aerial operations, as well as noise from other construction activities, we advise you to close all doors and windows to homes and buildings.

As part of this Project, temporary construction support sites will be required along the alignment. These sites will serve as temporary storage for materials and equipment and will be used for parking during construction hours. These temporary sites will be restored to their original condition and use upon completion of the Project.

We apologize in advance for any inconvenience you may experience during construction activities. SDG&E will continue to work closely with local municipalities and community groups to ensure construction activities are as least disruptive as possible. We also plan to keep communities informed during all phases of the Project's construction. We're committed to working with you and local public safety officials to help minimize inconveniences and safeguard a smooth construction process.

If you have any questions or require additional information, please call **(844) 765-6388**. Additional project information may be found at the California Public Utilities Commission web page at <https://www.cpuc.ca.gov/environment/info/ene/delmar/delmar.html>.

Sincerely,

Jennifer Ramp
