BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Expedited Application of SAN DIEGO GAS & ELECTRIC COMPANY (U 902-E) under the Energy Resource Recovery Account Trigger Mechanism Application 12-04-xxx (filed April 9, 2012)

EXPEDITED TRIGGER APPLICATION OF SAN DIEGO GAS & ELECTRIC COMPANY (U 902-E)

I. INTRODUCTION

Pursuant to Decision ("D.") 02-10-062 and in accordance with the California Public Utilities Commission ("Commission") Rules of Practice and Procedure, San Diego Gas & Electric Company ("SDG&E") respectfully submits this Expedited Trigger Application addressing the disposition of SDG&E's current Energy Resource Recovery Account ("ERRA") balance.

As explained in more detail in the Direct Testimony of SDG&E witness Gregory Shimansky, the ERRA balance is currently projected to be approximately \$53 million undercollected as of June 30, 2012¹ (based on actual numbers through February and projected numbers for March through June). The primary causes of this undercollection are the delay in 2012 revenue implementation, sales coming in below forecasted levels, and the natural seasonality gap in revenues versus expenses. SDG&E proposes that the approximately \$53 million undercollection be collected from ratepayers via a 12-month amortization period beginning on July 1, 2012, which is when SDG&E's ERRA forecast for 2012 is expected to be implemented. If the final Decision in the 2012 ERRA forecast

¹ Note that June 8, 2012 is approximately 60 days after the filing of this Application. According to D.02-10-062, trigger applications are to include a projected account balance in 60 days or more from the date of the filing. D.02-10-062, Conclusion of Law ("COL") 15.

proceeding is not adopted in time to allow for its implementation on July 1, 2012, then SDG&E requests that it be allowed to implement the trigger decision on the day the 2012 ERRA forecast is implemented, whenever that occurs. The purpose of this timing request is to ensure that ratepayers do not have to endure multiple rate changes within a short period of time.

If this Application is approved as proposed, the impact of the Trigger Application on a typical monthly summer electric bill (based on 500 kilowatt-hours of electricity) will be an increase from approximately \$81.32 to \$81.91 (or 0.7 percent) for inland customers and from approximately \$88.10 to \$89.28 (or 1.3 percent) for coastal customers. A typical monthly bill for residential customers who use 1,000 kilowatt-hours per month will increase from approximately \$216.28 to \$221.54 (or 2.4 percent) for inland customers and from approximately \$224.98 to \$230.82 (or 2.6 percent) for coastal customers. SDG&E's small commercial customers will see an increase of approximately \$5.62 on their monthly summer electric bill or 1.9 percent (based on 1,500 kWh of electricity for secondary service).²

II. BACKGROUND

The ERRA balancing account was established by the Commission to record the investor-owned utilities' ("IOUs") fuel and purchased power revenues against actual recorded costs, excluding revenues collected for the California Department of Water Resources ("CDWR").³ AB 57 mandated a trigger threshold for the balance in the ERRA

² Customers' actual bill impacts will vary with usage per month, by season and by climate zone.

³ California Public Utilities Code ("P.U. Code") Section 454.5(d)(3), initiated by Assembly Bill ("AB") 57.

of 5% of the electrical utility's actual recorded generation revenues for the prior calendar year.⁴

In accordance with D.02-10-062, SDG&E's ERRA is subject to a trigger mechanism designed to avoid ERRA balances above the 5% threshold. The trigger mechanism requires the filing of an expedited application for approval within 60 days from the filing date when the recorded monthly ERRA balance (undercollection or overcollection) exceeds a 4% trigger point and when the balance is projected to exceed the 5% threshold.⁵ The application should address a projected account balance; an amortization period for the balance of not less than 90 days; and a proposed allocation of the overcollection and/or undercollection among customers for rate adjustment based on the existing allocation methodology recognized by the Commission.⁶

D.07-05-008 added a new rule to the trigger procedures by allowing SDG&E to file an advice letter seeking to maintain rates when it expected an overcollection or undercollection above the 4% trigger to self-correct below the trigger within 120 days. However, in this case, self-correction is not expected within 120 days.

Furthermore, pursuant to D.04-01-050, SDG&E is required to file an advice letter by April 1 of each year to establish the current year's trigger amount. In Advice Letter 2335-E,⁷ dated March 7, 2012, SDG&E reported that its 2011 electric commodity revenue, excluding CDWR revenue, was \$1,085 million. Consequently, SDG&E's currently approved 4% trigger point is \$43.4million and the 5% ERRA threshold is

⁷ Approved by the Commission on April 3, 2012 and effective March 7, 2012.

\$54.2million. As explained by Mr. Shimansky, the projected undercollection is above the new trigger and threshold amounts.

III. REQUESTED RELIEF

Through this application, SDG&E is seeking the Commission's expedited authorization to increase rates to cover a projected \$52.638 million ERRA undercollection. To avoid multiple rate increases, SDG&E also seeks approval to implement the proposed rate increase over a 12-month amortization period, beginning on July 1, 2012 or whenever the 2012 ERRA forecast is implemented.

IV. STATUTORY AND PROCEDURAL REQUIREMENTS

6. Rule 3.2 (a) (7) – statement re tax depreciation

For financial statement purposes, depreciation of utility plant has been computed on a straight-line remaining life basis, at rates based on the estimated useful lives of plan

properties. For federal income tax accrual purposes, SDG&E generally computes depreciation using the straight-line method for tax property additions prior to 1954, and liberalized depreciation, which includes Class Life and Asset Depreciation Range Systems, on tax property additions after 1954 and prior to 1981. For financial reporting and rate-fixing purposes, "flow through accounting" has been adopted for such properties. For tax property additions in years 1981 through 1986, SDG&E has computed its tax depreciation using the Accelerated Cost Recovery System. For years after 1986, SDG&E has computed its tax depreciation using the Modified Accelerated Cost Recovery Systems and, since 1982, has normalized the effects of the depreciation differences in accordance with the Economic Recovery Tax Act of 1981 and the Tax Reform Act of 1986.

Illustrative Rate Impacts

ILLUSTRATIVE IMPACT ON ELECTRIC RATES AND BILLS

If the CPUC approves the rate increase SDG&E is seeking in this Expedited Trigger Application, a typical non-CARE residential customer living in the inland climate zone and using 500 kilowatt-hours per month could see a monthly summer bill increase of 0.7%, or \$0.59. A typical monthly electric bill could increase from \$81.32 to \$81.91. Changes in individual bills will also depend on how much electricity each customer uses.
