Andy Renger
Project Manager
San Diego Gas & Electric Company
8315 Century Park Court, CP21C
San Diego, CA 92123

SUBJECT: SDG&E 649 Project

Dear Mr. Renger:

Otay Water District (District) is in receipt of your email dated September 17, 2014, regarding water availability for the proposed SDG&E 649 Project starting at Heritage Road in Chula Vista heading eastbound towards SR-125 and then south past Donovan State Prison (Project). Our understanding is that water usage for the Project is estimated at 4.5 million gallons for the duration of construction.

The District has no objections with providing water for construction purposes for the above mentioned Project. The San Diego Gas & Electric Company (SDG&E) and/or the Construction Contractor working on behalf of SDG&E will be responsible for all costs associated with obtaining temporary construction meter(s) and water usage during construction. The temporary construction meter(s) applications (**TEMPORARY WATER METERS (FOR USE ON HYDRANT)**) can be obtained from the District's web page at http://www.otaywater.gov/engineering/public_services.

At the July 2, 2014 Board of Director's meeting, the District approved a temporary moratorium on the installation of new recycled water facilities in its Otay Mesa service area. The full staff report is available on the District's website <http://www.otaywater.gov/Otay/agenda.aspx>.

As a result of this action, during the course of the temporary moratorium, the District will not be advancing recycled water projects, requiring the installation of new recycled water infrastructure, nor issuing permits for new recycled water meters for the Otay Mesa service area. Water to new development will be supplied from the District's potable water system to meet current and future developer project demand.

Andy Renger

Page 2

Please note the moratorium is limited to Otay Mesa and does not apply to the implementation of recycled water projects in east Chula Vista (the District's Central Area) where recycled water is available. The District continues to stand firm in its commitment to the use of recycled water in order to minimize overall demand for potable water and is proud to operate one of the largest recycled water distribution systems in San Diego County.

Water availability is subject to all District requirements in effect at this time of application. You are strongly encouraged to adopt water conservation measures throughout the development. In response to Governor Brown's declaration of a state-wide drought calling on all Californians to save water, the District has declared a Level 2 – Supply Alert. Under Supply Alert, customers are urged to reduce water use by 11 to 20 percent.

The applicant should contact all necessary agencies, including the Fire Department and sewer purveyors, for any requirements. The District should then be contacted at (619) 670-2241 regarding any other conditions that may have arisen since this letter was written for this Project.

Should you have any questions, please contact Public Services at (619) 670-2241 or via e-mail at pscounter@otaywater.gov.

Sincerely,
OTAY WATER DISTRICT

Dan Martin, P.E.
Engineering Manager
