No-Cost Energy Audit for your School

Through SDG&E's Business Energy Solutions (BES) program, we offer public K-12 schools no-cost energy audits to help them identify and implement energy-saving upgrades, such as faucet aerators, tank insulation, heat pump water heaters and more. Switching to energy-efficient equipment can help reduce energy use, maintenance costs and GHG emissions.

We set you up with an SDG&E-authorized contractor who will perform the audit and make recommendations based on the size and scope of the project. The contractor will stay with the project from the beginning to the end and will help with recycling old equipment.

Program participation requirements

- Active, non-residential SDG&E® service account
- Public K-12 school
- Must pay the Public Purpose Program (PPP) surcharge on SDG&E bill

To learn more about the program or check out our catalog of offerings, visit **sdge.com/bes**.
