

EcoChoice® is the cleaner, greener choice

EcoChoice allows you to buy renewable energy, even if you don't own a home, can't afford the upfront cost of solar or cannot put solar panels on your roof.\*

### How ecochoice works

#### Did you know?

Signing up helps promote renewable energy in our region with no upfront installation costs and no disruption to your property, whether you rent or own.

Local, Southern California renewable resources power EcoChoice. Today, nearly 40% of the energy you use comes from renewable sources.

With EcoChoice, you're in control and have the option to increase that amount. By enrolling in EcoChoice, you can allocate your electricity to renewable energy from 50% to up to 100% each month.

Participation charges for this program depend on the cost of our EcoChoice renewable projects, which could result in an increase to your bill.

EcoChoice is Green-e® Energy certified and meets the environmental and consumer protection standards established by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org)

To sign up for EcoChoice or get more information, visit [sdge.com/EcoChoice](http://sdge.com/EcoChoice) or call 1-800-411-7343.

\*Although renewable electrons cannot be delivered to a specific location, through your enrollment SDG&E purchases an amount of renewable energy to be delivered to the grid equivalent to your subscription. Rates are subject to change at any time. Terms and conditions apply.
