To: SDG& E

Re: Data Request DR-04 (Red Text)

Date: 10-18-16

- 1) **SUPER-OFF-PEAK**, hours: 12am to 6am is this the correct hours for super off peak?
- 2) and is this 7 days per week or do the hours change on the weekend and holidays??
- 3) Is the entire super-off-peak period exempt from demand fees?
- 4) For example...."12am to 6am" I can use demand kW for 5 mins or for 15 mins or for 1 hour or for 6 hours and it will = ZERO DEMAND fees?
- 5) The means you are fully exempt from ZERO Demand Fees 7 days a week, 365 days per year for the entire 6 hours each and every day regardless of how many kW are used during this 6 hour period and regardless for how long I use these kW during these 6 hours as is this example?
- 6) If I use 100 kW demand at 1am I am exempt.
- 7) If I use 100 kW demand at 7am, this will still incur the non-coincident demand fee.
- 8) If I use 100 KW demand at 5pm, this will still incur the Peak Demand Fee.
- 9) **kWh maximum** per price plan: is there a max on the commercial price plans for the amount of kWh that can be used each month?
