Application of San Diego Gas & Electric Company (U 902 M) for Approval of The SDG&E Solar Energy Project
--

Application 08-07-

**APPLICATION OF SAN DIEGO GAS & ELECTRIC COMPANY (U 902-M) FOR
APPROVAL OF THE SDG&E SOLAR ENERGY PROJECT**

**I.
INTRODUCTION**

In compliance the California Public Utilities' Commission's ("Commission" or "CPUC") Rules of Practice and Procedure Rule 3.2, consistent with and in support of State policy and addressing a particular part of the photovoltaic ("PV") market which, to this point, has been undeveloped, San Diego Gas & Electric Company ("SDG&E") requests the Commission to approve the SDG&E Solar Energy Project. SDG&E expects that this proposal will result in up to 77 MW_{dc} of new installed solar capacity in the San Diego load basin. This proposal is designed in such a way so that roughly two-thirds will be built, owned and operated by SDG&E and one-third will be owned by host customers or independent third parties. For SDG&E's portion of the project, SDG&E proposes to build, own and operate up to 52¹ megawatts ("MW") direct current ("dc") of distribution-connected solar photovoltaic ("PV") generating facilities in

¹ The direct current capacity reporting basis is frequently utilized in the PV industry to report PV system output. If capacity is expressed on an alternating current (ac) basis the dc to ac conversion will be based on the CEC conversion of 1 watt (dc) = 0.67 watt (ac) detailed as follows:

A Guide to Photovoltaic (PV) System Design and Installation, CEC 2001, pg. 8-9

DC to AC inverter conversion:	.90
Production tolerance derate:	.95
Temperature derate:	.89
Dirt & dust derate:	.93
<u>Mismatch & wiring derate:</u>	<u>.95</u>
Total (product):	.67

Using this conversion factor, 52 MW_{dc} equates to approximately 35 MW_{ac}.

SDG&E's load basin with a spending cap of \$250 million over a five year period. SDG&E further expects that the opportunities the SDG&E Solar Energy Project will create for customers to co-construct solar PV facilities with SDG&E under this proposal may result in the installation of up to an additional 25 MW_{dc} of capacity under the California Solar Initiative ("CSI") that would not have otherwise been built. In total, this proposal may result in up to 77 MW_{dc} of new installed solar capacity in the San Diego load basin. SDG&E Solar Energy Project consists of multiple individual installations of solar PV generating facilities each in the 1 - 2 MW_{ac}² size range. SDG&E plans to utilize tracking technology that will maximize a PV system output coincident with the predicted SDG&E system peak. SDG&E proposes to partner with hosts offering sites with open areas and parking lots, such as shopping malls and local governments, and with solar industry vendors and installers. The open areas and parking lots of the host partners offer particular advantages in that they are located close to SDG&E's load areas and are in close proximity to locations where SDG&E's distribution system can accommodate systems of 1 – 2 MW_{ac} in size. SDG&E also proposes to issue a competitive solicitation for the equipment and installation of the systems.

As discussed in greater detail below and in the testimony served concurrently herewith and incorporated by reference, this Application asks the Commission to:

1. Approve SDG&E's Solar Energy Project Application which would authorize SDG&E to spend up to \$250 million to build, own, maintain and operate up to 52 MW_{dc} of utility-owned solar photovoltaic generating facilities of approximately 1 to 2 MW_{ac} each from 2009 through 2013.
2. Approve SDG&E's request for funding to support the SDG&E Solar Energy Project in

² While 1-2 MW_{ac} is the primary target range, installations could be larger depending on specific site conditions.

the amounts of \$214,000 in 2008 and \$1,662,000 for each year from 2009 until included in the base margin generation revenue requirement after SDG&E's 2012 GRC for annual administration and preliminary development costs.

3. Find that SDG&E's proposed Tier 3 advice letter approval process is reasonable.

II. BACKGROUND

A. Existing State Policy

California state policy is to increase the use of renewable energy in many ways. The renewable portfolio standard ("RPS") program, which requires 20% of retail electric sales be served by renewable resources by 2010, is foundational. Building on this, Governor Schwarzenegger signed landmark legislation establishing the Million Solar Roofs Plan or CSI, to develop 3,000 MW of rooftop solar photovoltaic installations by 2016.

More recently, the State set forth greenhouse gas ("GHG") emission reduction targets by enacting Assembly Bill ("AB") 32 to reduce statewide GHG emissions to 1990 levels by 2020, to be achieved in large part through increased production of renewable energy.

Further, the Commission and the California Energy Commission ("CEC") provided joint leadership in implementing programs to meet the renewable energy goals of the State in their 2003 joint Energy Action Plan ("EAP"), in which they stated their intent to achieve the 20% renewables goal by 2010, seven years ahead of the statutory deadline in effect at the time. In their 2008 update to the EAP, the Commission and the CEC placed particular emphasis on the potential benefits of solar energy: "...since California has an abundance of powerful sunlight."

In order to meet the State's renewable and GHG goals the Commission has focused significant attention on implementing the RPS program, the CSI program as well as encouraging investor owned utilities to build, own and operate renewable generation assets, particularly solar PV.

B. Existing State Programs

The CSI provides substantial incentives to promote the development of solar power on a small-scale basis, but only for projects up to 1 MW_{ac} in size. The CSI program is designed to reward PV systems which maximize energy production output. As a result, to date, all of the CSI solar installations located within the San Diego load center comprise fixed panel installations, both flat and tilted, which do not maximize their capacity output coincident with the time of day that SDG&E experiences its system peak.

The RPS, in contrast, allows investor owned utilities to purchase renewable power from commercial generators. To date, no projects of the 1 to 2 MW_{ac} size have been built in SDG&E's load center through SDG&E's RPS request for offers ("RFO") process.

Thus, in SDG&E's load center, a "gap" exists for constructing solar systems that are 1 to 2 MW_{ac} in size and capable of maximizing their capacity output coincident with the time of day that SDG&E experiences its system peak in its service territory

In addition to the CSI and RPS RFO programs, the Commission has urged the investor owned utilities to be creative in identifying other viable means of achieving their individual and, by implication, the State's RPS goals. In decision D.08-02-008 the Commission encouraged the utilities "...to actively assess the feasibility of utility ownership, and pursue such ownership when and where it makes sense."

Consistent with the State's policy, the Commission's programs and guidance, in an effort to remedy the solar PV generation gap identified above and to maximize the benefits offered by solar resources in its load center, SDG&E developed the SDG&E Solar Energy Project which will, as is discussed in greater detail in Chapters I through IV of SDG&E's testimony, effectively develop currently untapped solar power projects which complement both the CSI and RPS programs. In addition, the SDG&E Solar Energy Project will help facilitate the development by

third parties of up to an additional 25 MW_{dc} of new photovoltaic installations under the State's CSI program that would otherwise likely not have been developed.

III. SUMMARY OF APPLICATION

The SDG&E Solar Energy Project Application requests the Commission to:

1. Approve SDG&E's Solar Energy Project Application which would authorize SDG&E to spend up to \$250 million to build, own, maintain and operate up to 52 MW_{dc} of utility-owned solar photovoltaic generating facilities of approximately 1 to 2 MW_{ac} each from 2009 through 2013.
2. Approve SDG&E's request for funding to support the SDG&E Solar Energy Project in the amounts of \$214,000 in 2008 and \$1,662,000 for each year from 2009 until included in the base margin generation revenue requirement after SDG&E's 2012 GRC for annual administration and preliminary development costs.
3. Find that SDG&E's proposed Tier 3 Advice Letter approval process is reasonable.

The SDG&E Solar Energy Project Application is supported by five SDG&E witnesses: James Avery, Senior Vice President, Electric; Frank Thomas, Manager, Project Supply, Electric Project Development & Business Planning; Tom Bialek, Chief Engineer, Transmission & Distribution Asset Management; Christopher Yunker, Principal Business Analyst, Finance; and Michelle Somerville, Regulatory Accounts Manager, Tariffs and Regulatory Accounts. The witnesses' prepared direct testimony is served concurrently herewith, incorporated in the Application by reference, and summarized below.

A. SDG&E's Policy (Chapter I)

SDG&E witness James Avery describes SDG&E's policy and purpose in filing its

Application. Mr. Avery states that, consistent with and in support of State policy, the SDG&E Solar Energy Project addresses how a particular part of the solar PV market which, to this point, has been underdeveloped, can be developed through the Commission's approval of its Application to own and operate up to 52 MW_{dc} of distribution-connected solar PV capacity and energy in SDG&E's load center.

B. SDG&E'S Solar Energy Project (Chapter II)

SDG&E witnesses Frank Thomas and Tom Bialek describe the reasons for developing SDG&E's Solar Energy Project and the actions SDG&E intends to undertake to implement the SDG&E Solar Energy Project. Mr. Thomas and Mr. Bialek provide a detailed description of the proposed SDG&E Solar Energy Project, and describe the need for the SDG&E Solar Energy Project, the objectives and benefits of the SDG&E Solar Energy Project, the technology to be used therein, why SDG&E is well situated to implement the SDG&E Solar Energy Project, and costs of the SDG&E Solar Energy Project.

C. SDG&E Solar Energy Project's Revenue Requirements (Chapter III)

SDG&E witness Christopher Yunker, describes SDG&E's Solar Energy Project's revenue requirements. Mr. Yunker provides an illustrative revenue requirement which reflects the aggregate impact of the SDG&E Solar Energy Project fully implemented as well as the assumptions that are the basis for the calculations. Mr. Yunker describes how after Commission approval of the SDG&E Solar Energy Project in this Application, SDG&E will develop revenue requirements for individual installations to be provided in a Tier 3 Advice Letter. Revenue requirements for individual facilities will vary; the revenue requirement illustrated here provides the aggregate impact of all facilities developed under the SDG&E Solar Energy Project as if they were implemented at \$7,000/kW_{dc}, the upper end of the range as outlined in SDG&E witness

Thomas' testimony in Chapter II.

D. SDG&E's Solar Energy Project Cost Recovery Proposal (Chapter IV)

SDG&E witness Michelle Somerville describes SDG&E's outline for its proposal for recovery of costs associated with implementing SDG&E's Solar Energy Project. Ms. Somerville describes SDG&E's proposal to recover incremental preliminary development expenses, capital expenses, operation and maintenance expenses, and annual administrative costs for the SDG&E Solar Energy Project. SDG&E proposes to recover the administrative and preliminary development costs requested in this application through the Non-fuel Generation Balancing Account ("NGBA"). Upon approval and completion of individual facilities, the applicable revenue requirements as authorized by the Commission in Tier 3 Advice Letters will also be recovered through the NGBA. SDG&E also proposes to balance authorized revenue requirements for the SDG&E Solar Energy Project with recorded expenses in a new balancing account labeled the Solar Energy Project Balancing Account ("SEPBA"). In addition, SDG&E's proposes a regulatory framework for Commission approval of each individual solar installation prior to construction in a Tier 3 Advice Letter.

**IV.
SDG&E'S SOLAR PV PROGRAM DOES NOT REQUIRE CEQA
REVIEW BY THE COMMISSION**

SDG&E's Solar Energy Project does not trigger environmental review by the Commission. It is long established that the act of ratemaking by the Commission is exempt from review under the California Environmental Quality Act ("CEQA"). As stated in California Public Resources Code § 21080(b)(8), the "establishment, modification, structuring, restructuring, or approval of rates, tolls, fares, or other charges by public agencies" including "obtaining funds for capital projects necessary to maintain service areas" is exempt from CEQA.

The Commission has repeatedly stated that its rate orders are exempt from CEQA and the California Supreme Court has declined to overturn. (CPUC Decision No. 87-02-028.) This proceeding clearly falls within such a statutory exemption and should be noted by the Commission in its findings, as required by CEQA Guidelines §15273(c).³

Further, agencies may dispense with CEQA review “if it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.” (CEQA Guidelines § 15061(b)(3)). Here, the proposed PV systems installations would not result in a significant effect on the environment. The proposed Solar Energy Project does not involve installations in residential areas. Instead, the individual installations would likely occur in existing parking lots of commercial and/or industrial areas with shaded parking and previously disturbed open areas in an effort to minimize environmental effects. The primary types of solar PV installations will be land based solar arrays and parking lot shading PV arrays. In addition, the inverter systems would either be located within building electrical rooms or would otherwise be located next to buildings in an unobtrusive manner. As a result, the installations contemplated by SDG&E’s Solar Energy Project will not have a significant effect on the environment.

At this early planning stage in the proposed program, SDG&E contemplates certain locations for the installations but is uncertain as to the exact areas throughout its service territory and the detailed descriptions thereof. SDG&E has only anticipated a series of multiple installations between 2009 and 2013 up to the 52 MW_{dc} total capacity. In the absence of any project descriptions, even if the program was not exempt from CEQA, there would be no ability for an agency to perform any environmental review at this time.

³ “(c) The public agency shall incorporate written findings in the record of any proceeding in which an exemption under this section is claimed setting forth with specificity the basis for the claim of exemption.”

More importantly, under the California Solar Rights Act,⁴ local governments are precluded from adopting ordinances that would unreasonably restrict the use of solar energy systems in residential and commercial capacities. The Act also states that it is the intent of the Legislature to prohibit local governments from adopting ordinances that “create unreasonable barriers to the installation of solar energy systems, including but not limited to, design review for aesthetic purposes...” (Cal. Govt. Code § 65850.5.) In addition, the Act requires that local governments use a non-discretionary permitting process for solar energy systems. (See, Cal. Govt. Code § 65850.5(a) and Cal. Health and Safety Code § 17959.1.) California law requires that this non-discretionary review process be limited to “those standards and regulations necessary to ensure that the solar energy system will not have a specific, adverse impact upon the public health or safety.” (Cal. Govt. Code §65850.5(b).) The Act prevents cities and counties from denying solar energy system building permits unless there is substantial recorded evidence that it would have a specific, adverse impact on public health and safety. If the local jurisdiction found that the potential for an adverse impact existed, it would require that a discretionary permit be issued. (Cal. Govt. Code § 65850.5(c).) In that event, however, SDG&E would not pursue the installation of the proposed facilities.

Even though this ratemaking proceeding is exempt from CEQA review and SDG&E’s proposed Solar Energy Project is exempt from CEQA review by the Commission at this time, SDG&E recognizes that such facilities must still comply with all “applicable safety and performance standards established by the National Electric Code, the Institute of Electrical and Electronics Engineers and accredited testing laboratories such as Underwriters Laboratories, and the rules of the Public Utilities Commission regarding safety and reliability.”

⁴ The Solar Rights Act is comprised of the following California Codes: Civil Code §§ 714 and 714.1, Civil Code §§ 801 and 801.5, Government Code § 65850.5, Health and Safety Code § 17959.1, Government Code § 66475.3 and

V.
STATUTORY AND PROCEDURAL REQUIREMENTS

A. Proposed Category, Issues to be Considered, Need for Hearings and Proposed Schedule

SDG&E proposes to categorize this Application as a “rate-setting” proceeding within the meaning of Rules 1.3(e) and 7.1. SDG&E proposes the following schedule:

Schedule

Filing of Application	July 11, 2008
Protests Due	August 8, 2008
Reply to Protests	August 21, 2008
Pre-Hearing Conference	August 28, 2008
DRA and Intervenors File Opening Testimony	September 25, 2008
Rebuttal Testimony Due	October 6, 2008
Hearings	October 20-24, 2008
Concurrent Opening Briefs Due	November 17, 2008
Concurrent Reply Briefs Due	December 1, 2008
Commission Issues Proposed Decision	February 15, 2009
Comments on Proposed Decision	March 16, 2009
Replies to Comments on Proposed Decision	March 23, 2009
Commission Issues Final Decision	April 2009

B. Statutory Authority – Rule 2.1

This Application is made pursuant to Sections 451, 701, 702 , 728, and 729 of the Public Utilities Code of the State of California; the Commission’s Rule of Practice and Procedure; and the other relevant prior decisions, orders, and resolutions of the Commission.

Government Code § 66473.1.

C. Legal Name, Place of Business/Incorporation – Rule 2.1(a)

Applicant's legal name is San Diego Gas & Electric Company. SDG&E is a public utility corporation organized and existing under the laws of the State of California, with its principal place of business at 8830 Century Park Court, San Diego, California 92123.

D. Correspondence – Rule 2.1(b)

Correspondence or communications regarding this application should be addressed to:

Rasha Prince
Regulatory Case Manager For:
San Diego Gas & Electric Company
555 West Fifth Street, GT14D6
Los Angeles, California 90013
Telephone: (213) 244-5141
Facsimile: (213) 244-4957
E-Mail: rprince@semprautilities.com

With a copy to:

Steven D. Patrick
Attorney For:
San Diego Gas & Electric Company
555 West 5th Street, Suite 1400
Los Angeles, CA 90013
Telephone: (213) 244-2954
Facsimile: (213) 629-9620
E-Mail: spatrick@sempra.com

E. Articles of Incorporation - Rule 16

SDG&E is incorporated under the laws of the State of California. A certified copy of the restated Articles of Incorporation, as last amended, currently in effect and certified by the California Secretary of State, was filed with the Commission on October 1, 1998 in connection with SDG&E Application No. 98-10-012, and is incorporated herein by reference.

F. Financial Statement, Balance Sheet, and Income Statement - Rule 3.2(a)(4)

Appendix A to this Application is SDG&E's Financial Statement, Balance Sheet and Income Statement as of March 31, 2008.

G. Rates – Rules 3.2(a)(2) and 3.2(a)(3)

The current and proposed rates that will result from this Application are described in Appendix B.

H. Property and Equipment – Rule 3.2(a)(4)

A general description of SoCalGas and SDG&E's respective properties was filed with the Commission on October 5, 2001, in connection with Application 01-10-005, and is being incorporated herein by reference. Appendix C to this Application is a statement of SDG&E's Costs of Property and Depreciation Reserve applicable thereto as of March 31, 2008.

I. Summary of Earnings – Rules 3.2(a)(5)

Appendix D to this Application is a Summary of Earnings for SDG&E for the 3 months ended March 31, 2008.

J. Depreciation – Rule 3.2(7)

For financial statement purposes, depreciation of utility plant has been computed on a straight-line remaining life basis at rates based on the estimated useful lives of plant properties. For federal income tax accrual purposes, SDG&E generally computes depreciation using the straight-line method for tax property additions prior to 1954, and liberalized depreciation, which includes Class Life and Asset Depreciation Range Systems, on tax property additions after 1954 and prior to 1981. For financial reporting and rate-fixing purposes, “flow through accounting” has been adopted for such properties. For tax property additions in years 1981 through 1986, SDG&E has computed its tax depreciation using the Accelerated Cost Recovery System. For years after 1986, SDG&E has computed its tax depreciation using the Modified Accelerated Cost Recovery Systems and, since 1982, has normalized the effects of the depreciation differences in

accordance with the Economic Recovery Tax Act of 1981 and the Tax Reform Act of 1986.

K. Proxy Statement – Rule 3.2(a)(8)

A copy of SDG&E's most recent proxy statement, dated April 4, 2008, was mailed to the California Public Utilities Commission on April 29, 2008 and is incorporated herein by reference.

L. Pass Through of Costs – Rule 3.2(a)(10)

The changes that SDG&E seeks in this Application reflect estimated costs to SDG&E, and SDG&E proposes to pass through to customers only costs that SDG&E incurs for the services and commodities it furnishes.

M. Service and Notice – Rule 3.2(b)

SDG&E is serving this Application on all parties to A.08-03-015, R.06-03-004, and R.04-04-026. Within ten days of filing this application, SDG&E will mail notice of this Application to the State of California and to cities and counties within SDG&E's service territory and SDG&E will post the notice in its offices and publish the notice in newspapers of general circulation in each county in its service territory. In addition, SDG&E will include notices with the regular bills mailed to all customers affected by the proposed rate changes. The service list of state and government agencies is attached hereto as Appendix E.

**VI.
RELIEF REQUESTED**

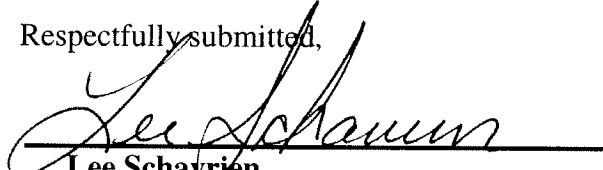

For the reasons set forth in this Application and accompanying testimony, SDG&E respectfully asks the Commission to:

- 1) Consider this Application and grant all the relief requested herein.
- 2) Find that SDG&E's proposals are in conformance with the Commission directives and policies.
- 3) Grant other such relief as the Commission may deem necessary.

WHEREFORE, SDG&E respectfully requests the Commission grant its Application as filed.

Dated this 11th day of July, 2008.

Respectfully submitted,

Lee Schavrien

Senior Vice President

San Diego Gas & Electric Company

Steven D. Patrick

Attorney for

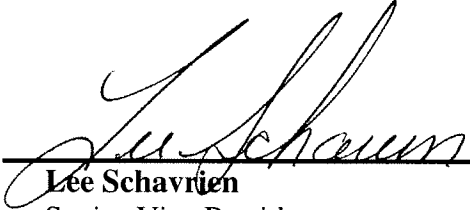

San Diego Gas & Electric Company

VERIFICATION

I am an officer of San Diego Gas & Electric Company, and am authorized to make this verification on its behalf. I am informed and believe that the matters stated in the foregoing Application are true and to my own knowledge, except as to matters which are therein stated on information and belief, and as to those matters I believe them to be true.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed this 11th day of July, 2008 at San Francisco, California.

Lee Schavrien

Senior Vice President

San Diego Gas & Electric Company

CERTIFICATE OF SERVICE

I hereby certify that I have this day served a copy of **NOTICE OF AVAILABILITY** of the foregoing **APPLICATION OF SAN DIEGO GAS & ELECTRIC COMPANY (U 902 M) FOR APPROVAL OF SOLAR PV** has been electronically mailed to each party of record of the service list in **A.08-03-015, R.06-03-004/R.08-03-008, R.04-04-026, R.06-02-012 and R.06-05-027**. Any party on the service list who has not provided an electronic mail address was served by placing copies in properly addressed and sealed envelopes and by depositing such envelopes in the United States Mail with first-class postage prepaid.

Copies were also sent via Federal Express to Chief Administrative Law Judge Angela Minkin

Executed this 11th day of July, 2008 at Los Angeles, California.

Marivel Munoz
