PREPARED DIRECT TESTIMONY OF

KENNETH E. SCHIERMEYER IN SUPPORT OF SECOND AMENDED APPLICATION

CHAPTER 4

I. **OVERVIEW AND PURPOSE**

The purpose of this testimony is to present the forecast of electric sales for San Diego Gas & Electric Company's ("SDG&E") Test Year ("TY") 2016 General Rate Case ("GRC") Phase 2. This testimony also discusses the request to update the electric sales forecast, beyond the approved test-year, for use in the billing determinant process.

The testimony is organized as follows:

- **Section II Background:** Provides a background of recent applications that introduced an electric sales forecast. Provides the justification for the introduction of an updated electric sales forecast in this proceeding.
- Section III Forecast of TY 2016 Electric Sales: Presents SDG&E's updated electric sales for TY 2016. Presents the differences between the electric sales forecast provided in this testimony and the electric sales forecast that was provided in TY 2016 GRC Phase 1 application.
- Section IV Update to Sales Forecast Drivers: Describes the sources and development of the electric sales forecast. Outlines the changes in the electric sales forecast drivers with those submitted in TY 2016 GRC Phase 1.
- Section V TY 2016 Monthly Rate Schedule & Hourly Forecasts: Describes the process that splits the annual electric sales forecast into monthly rate schedule and hourly forecasts. The monthly rate schedule breakout of the electric sales forecast is used by SDG&E witness Christopher Swartz (Chapter 2), and the

17

18

19

20

21

hourly breakout of the electric sales forecast is used by SDG&E witnesses Robert Anderson (Chapter 3) and Jeffrey Shaughnessy (Chapter 7).

- Section VI Proposal for Annual Sales Forecast Updates: Presents SDG&E's proposal to update its electric sales forecast on an annual basis, beyond the approved test-year.
- Section VII Conclusion
- Section VIII Witness Qualifications
- Attachment A CEC Consumption Tables
- Attachment B CEC Private Supply Tables
- Attachment C CEC AAEE Table
- Attachment D R1 Electric Sales (contains confidential information)
- Attachment E Net Electric Sales (contains confidential information)
- Attachment F Delivered Electric Sales (contains confidential information)

II. BACKGROUND

In the prior GRC, SDG&E submitted an electric sales forecast in Phase 1 of the proceeding, and the same forecast was subsequently used in and implemented with Phase 2 of the proceeding. In this GRC, SDG&E filed a sales forecast as part of the 2016 GRC Phase 1 application (Application ("A.") 14-11-003). However, consistent with direction set forth in in Decision ("D.") 15-08-040, SDG&E is submitting an updated 2016 TY electric sales forecast as part of this testimony in support of its proposal to change its time of use ("TOU") periods, as discussed in the testimony of Cynthia Fang (Chapter 1) and Robert Anderson (Chapter 3).

¹ A.14-11-003, Direct Testimony of Kenneth Schiermeyer.

In D.15-08-040, SDG&E's 2015 Rate Design Window ("RDW") Application ("A.") 14-01-027), the California Public Utility Commission ("Commission") denied SDG&E's proposal to change its TOU periods without prejudice, providing SDG&E the opportunity to make a similar proposal in its GRC Phase 2 application. As discussed in the testimony of Ms. Fang and Mr. Anderson, SDG&E is including in this proceeding, a proposal to change SDG&E's existing TOU periods. In support of this proposal, the most recent, detailed electric sales data is presented in this chapter. Consistent with the direction set forth in D.15-08-040, SDG&E is therefore submitting a revised 2016 TY electric sales forecast as part of this testimony in support of its proposal to change TOU periods.

III. FORECAST OF TY 2016 ELECTRIC SALES

SDG&E requests that the Commission approve the updated forecast of electric sales for SDG&E's TY 2016, as presented in this testimony. Table KS-1 sets forth the updated forecast of energy sales for SDG&E's electric customers.

TABLE KS-1:
ANNUAL ELECTRIC SALES (GWh)

Sector TY 2016 Residential 7,378 Non-Residential 12,302 Total 19,680

2

3

4

Table KS-2 compares the electric sales forecast presented in SDG&E's 2016 GRC Phase 1 with the electric sales forecast presented in this testimony.

TABLE KS-2:

COMPARISON OF ANNUAL ELECTRIC SALES (GWh)

		Current Filing		
	GRC Phase 1	GRC Phase 2		
Sector	TY 2016	TY 2016	Change	% Change
Residential	7,681	7,378	-303	-3.9%
Non-Residential	12,332	12,302	-30	-0.2%
Total	20,013	19,680	-333	-1.7%

5 6

7

8

9

10

11

12

13

14

The basis for the update to the electric sales forecast versus what was submitted in the GRC Phase 1 Application is discussed in Section IV.

IV. UPDATE TO SALES FORECAST DRIVERS

Both electric sales forecasts presented in TY 2016 GRC Phase 1 and TY 2016 GRC Phase 2 are based on a California Energy Commission's ("CEC") adopted California Energy Demand ("CED") forecast. The CEC typically completes a fully updated forecast in the Integrated Energy Policy Report ("IEPR") every two years and provides a limited update of that forecast in the interim years. The TY 2016 GRC Phase 1 forecast was based on the CEC's adopted 2013 CED mid-demand forecast⁴ and includes the impacts of the CEC's Private Supply

⁴ California Energy Demand 2014-2024 Final Forecast, Volume 2: Electricity Demand by Utility Planning Area, Publication Number CEC-200-2013-004-SF-V2, and Publication Date: December 2013. See "SDG&E Form 1.1 Consumption" available at http://www.energy.ca.gov/2013_energypolicy/documents/ demand-forecast_CMF/mid_case/ (Included in the file named "SDG&E_Mid.xls").

1	and Additional Achievable Energy Efficiency ("AAEE"). ⁵ Forecasts of electric sales are derived
2	from CEC data as follows:
3	Electric Consumption
4	Less: Private Supply (Self-Generation, e.g. PV)
5	Less: AAEE (Future Impacts of Energy Efficiency Programs)
6	Equals: Electric Sales
7	The forecast presented in Table KS-1 reflects the CEC's most recent adopted forecast, the
8	2014 CED Updated Forecast, mid-demand consumption scenario. The 2014 CED Updated
9	Forecast is an interim year forecast that reflects a partial update from the 2013 CED Forecast.
10	Relative to the 2013 CED Forecast, the 2014 CED Forecast was updated for two major concepts:
11	Incorporating more recent economic and demographic projections.
12	Adjusting for the latest historical data available for consumption, peak demand,
13	temperatures, and electricity rates.
14	Details to the CEC's updates can be found in their "California Energy Demand Updated
15	Forecast, 2015-2025" report. ⁷
16	SDG&E's GRC Phase 2 electric sales forecast reflects the private supply component as
17	projected by the CEC in their 2015 Preliminary CED Forecast, mid-demand-scenario. The
18	impact of photovoltaic generation ("PV") has noticeably changed since 2014 and this difference
19	is reflected in SDG&E's updated TY 2016 electric sales forecast. Chart KS-1 compares the most

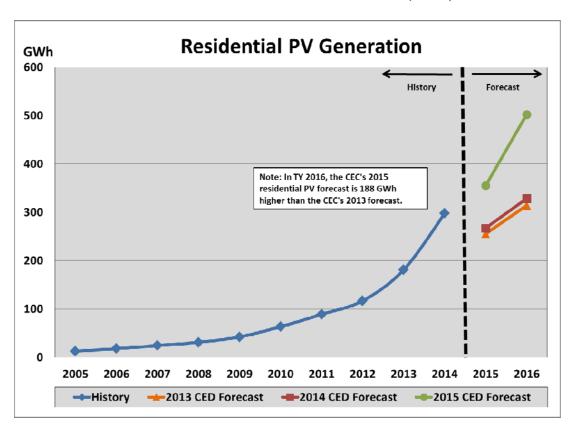

⁵ Available at http://www.energy.ca.gov/2013_energypolicy/documents/demandforecast_CMF/Additional Achievable Energy Efficiency/AAEE Savings SDG&E Service Territory.xls (see "S3-Mid").

_Achievable_Energy_Efficiency/AAEE Savings SDG&E Service Territory.xls (see "S3-Mid").
⁶ CED 2014, California Energy Demand Updated Forecast, 2015-2025, Volume 2: Electricity Demand by Utility Planning Area, Publication Number CEC-200-2014-009-CMF, and Publication Date: Adopted January 14, 2015. See "SDGE Form 1.1-Mid (Electricity Consumption by Sector)" available at http://www.energy.ca.gov/2014 energypolicy/documents/demand forecast cmf/Mid Case/ (Included in the file named "SDG&E_Mid.xls").

⁷ CED 2014, pages 31-34.

recent three residential CEC PV generation forecasts, along with history through 2014. SDG&E incorporated the 2015 preliminary CED forecast for PV to better reflect this recent data, since the 2014 CED Updated Forecast does not include updated projections for PV relative to the 2013 CED Updated Forecast.⁸ As shown in Chart KS-1, the private supply estimates from the CEC's most recent 2015 Preliminary CED Forecast, mid-demand-scenario,⁹ more appropriately reflect the rapidly-changing residential PV component in SDG&E's service territory.

CHART KS-1:
COMPARISON OF CEC PV FORECASTS (GWh)

1

2

3

4

5

6

7

8

⁸ The minor differences in the PV information between the 2013 CEC Forecast and 2014 CEC Forecast are attributed to updated actuals between the two reports.

⁹ Available at http://www.energy.ca.gov/2015 energypolicy/documents/2015-0707_preliminary_forecast_forms.html (see "Mid Case Final Baseline Demand Forecast" located in the file "SDGE_Mid_Demand_Case.xlsx" in the tab labeled "Form 1.2-Mid").

A comparison of the electric sales derivation for Phase 1 and Phase 2 is detailed in Table KS-3.

TABLE KS-3:
ELECTRIC SALES FORECAST DERIVATION, TOTAL SYSTEM (GWh)

	GRC Phase 1	GRC Phase 2	Change	% Change
	TY 2016	TY 2016		
Consumption	21,855	21,691	-164	-0.8%
Less: Private Supply	1,301	1,513	212	16.3%
Less: AAEE	541	498	-43	-7.9%
Equals: Sales	20,013	19,680	-333	-1.7%

V. TY 2016 MONTHLY RATE SCHEDULE & HOURLY FORECASTS

The CEC presents forecast concepts on an annual basis. However, in this proceeding, SDG&E witnesses Mr. Swartz, Mr. Anderson and Mr. Shaughnessy require the electric sales forecast to be available on an hourly and monthly basis, by rate schedule.

Econometric models were used to develop hourly forecasts for the Residential, Small Commercial, Medium/Large Commercial and Industrial, Agricultural, and Lighting classes.

These hourly models incorporate the impacts of rooftop PV installations, various weather concepts, calendar and seasonal variables, customer count information and other related

SDG&E's historical billing-cycle data was used to split the CEC's annual forecast into monthly forecasts by rate schedule. SDG&E reports electric sales volumes in its Revenue Reporting System ("R1"), which excludes adjustments for monthly excess PV generation, i.e.,

concepts.

negative values are excluded rather than "added in." SDG&E also creates monthly rate schedule billing determinants on a net and delivered basis. With the implementation of SDG&E's 2015 RDW¹⁰ Application, SDG&E created determinants based on net and delivered electric sales. Net sales represent R1 sales with the adjustment to account for excess PV generation that occurs on a monthly basis. Delivered sales represent the sales provided to the customer that would have otherwise been netted out by excess generation on an hourly basis. A comparison of the forecasted sales concepts are shown in Table KS-4.

TABLE KS-4:
COMPARISON OF R1, NET AND DELIVERED SALES (GWh)

Forecast Basis	TY 2016
Sales in R1 Format	19,680
Monthly Excess Generation Adjustment	-78
Net Sales	19,602
Hourly Delivered Sales Adjustment	+318
Delivered Sales	19,920

Hourly forecast data can be found in this chapter's associated workpapers. Monthly sales by rate schedule, along with the corresponding monthly spread factors that were applied to the CEC's annual forecast, can be found in Attachments D, E and F.

¹⁰ A. 14-01-027, Direct Testimony of Christopher Yunker, at p. CY-13.

VI. REQUEST FOR ANNUAL SALES FORECAST UPDATES

Currently, SDG&E updates test-year sales forecasts in its GRC or RDW proceedings. As presented in the testimony of Ms. Fang, SDG&E proposes that the Commission approve the use of an annual advice letter to update SDG&E's electric sales forecast, beyond the test-year. SDG&E needs to update test year sales more frequently to better capture the changes in electric sales. This would noticeably reduce the impact of under/over collections related to differences between actual sales and test-year sales. Updating the electric sales forecast on a more frequent basis will provide electric customers with a more appropriate set of billing determinants and would allow SDGE to collect revenues in a steadier manner. A comparison of test-year sales forecasts from past proceedings are shown in Table KS-5, highlighting the changes in projected sales and the amount of time it takes to implement these sales in the billing process.

TABLE KS-5:
COMPARISON OF TEST-YEAR ELECTRIC SALES OVER TIME (GWh)

Test-	File Date	Proceeding (Docket Number)	GWh	Effective
Year				Date
2012	12/15/2010	2012 General Rate Case Phase 1 (A.10-12-005)	20,809	5/1/2014
	10/3/2011	2012 General Rate Case Phase 2 (A.11-10-002)		5/1/2014
2015	1/31/2015	2015 Rate Design Window (A.14-01-027)	20,123	11/1/2015
2016	11/14/2014	2016 General Rate Case Phase 1 (A.14-11-003)	20,013	TBD
2016	12/1/2015	2016 General Rate Case Phase 2 (A.15-04-12)	19,680	TBD

As seen in Table KS-5 above, it can take a considerable amount of time to obtain approval of an updated sales forecast. More frequent updates will help soften the impacts to SDG&E customers.

SDG&E is proposing the use of updated electric sales forecasts beyond TY 2016. Table KS-6 presents forecast sales for 2017 and 2018 reflecting projected consumption, private supply and AAEE for those years. The electric sales forecasts presented in Table KS-6 are derived in a consistent manner with the proposed TY 2016 electric sales forecast detailed in Section IV of this testimony. In addition to its proposal to update authorized sales for the TY 2016 forecast, SDG&E requests approval to also update authorized sales in 2017 and 2018 via an advice letter to be implemented in January 1 rates that reflect the sales presented in Table KS-6. SDG&E will continue to request approval of updated electric sales forecast in future RDW or GRC applications.

TABLE KS-6:
FORECAST OF ELECTRIC SALES (GWh)

	2016	2017	2018
Consumption	21,691	21,998	22,276
Less: Private Supply	1,513	1,647	1,795
Less: AAEE	498	735	922
Equals: Sales	19,680	19,616	19,559

VII. CONCLUSION

SDG&E requests that the Commission find the electric sales forecast presented in this testimony to be reasonable and seeks approval of its use in the rate design process as well as in

- determining the change in SDG&E's time-of-use periods. For the reasons outlined herein, the
- 2 Commission should also find it reasonable to approve updates to SDG&E's electric sales
- 3 forecast on an annual basis beyond the approved test-year.
- 4 This concludes my prepared direct testimony.

VIII. WITNESS QUALIFICATIONS

My name is Kenneth E. Schiermeyer. My business address is 8306 Century Park Court, San Diego, California, 92123. I am employed by SDG&E as the Electric Demand Forecasting Manager in the Customer Pricing Department. My primary responsibilities include developing and coordinating forecasts of customer growth and electric energy usage.

I have held my current position since December 2013. Since 1999, I have been employed by SDG&E in various forecasting and analysis positions of increasing responsibility. From 1996 to 1999, I worked as a Computer Programmer and Project Manager for Directions in Research, Inc.

I received a Bachelor of Science degree in Economics from Truman State University in 1994 and obtained a Master of Arts degree in Economics from Western Illinois University in 1996.

I have previously testified before this Commission.
