Re: San Diego Gas & Electric Company's
Fifth Transmission Owner Formula's Second Annual Informational Filing;
Docket No. ER20-____-000

Dear Secretary Bose:

Pursuant to Section 205 of the Federal Power Act,¹ and Section 35.13 of the Commission's regulations,² San Diego Gas & Electric Company ("SDG&E") tenders for filing the Cycle 2³ Informational Filing ("Informational Filing" or "Filing") of its Fifth Transmission Owner ("TO") Formula rate mechanism ("TO5" or "TO5 Formula"). The proposed effective date is January 1, 2020.

This Filing is provided to the Federal Energy Regulatory Commission for informational purposes only. This Filing is not subject to the requirements of Section 205 of the Federal Power Act.⁴ Nor does this Filing subject SDG&E's TO5 Formula transmission rate to modification.⁵

¹ 16 U.S.C. §824d.

² 18 C.F.R. § 35.13.

³ The term "Cycle" refers to the number of annual filings made under the applicable formula. Cycle 2 is the second annual filing under the TO5 formula. Unless otherwise defined in this letter and accompanying volumes reference herein, capitalized terms are intended to have the meanings ascribed to them in SDG&E's TO Tariff.

⁴ 16 U.S.C. § 824d.

⁵ See Section C.4.c of the T05 Formula Rate Protocols ("Formula Rate Protocols").

SDG&E filed on October 30, 2018 in docket ER19-221 revisions to its TO Tariff⁶ to adopt the TO5 Formula, a new formula rate tariff, to succeed its TO4 Formula,⁷ which expired by its terms on December 31, 2018. SDG&E's TO Formula rate mechanism consists of Appendix VIII of SDG&E's TO Tariff and its two attachments: (1) the Formula Rate Protocols; and (2) the Formula Rate Spreadsheet. The Formula Rate Protocols set forth process-related items, such as the Annual Informational Filing timeline, as well as other various requirements that SDG&E must meet in its Annual Informational Filing.

The Formula Rate Spreadsheet sets forth the derivation of SDG&E's Base Transmission Revenue Requirements ("BTRR") for two groups: retail End Use customers ("BTRR_{EU}") and California Independent System Operator ("CAISO") wholesale customers ("BTRR_{CAISO}").

The BTRR_{EU} and BTRR_{CAISO} for each Rate Effective Period consist of the following four parts:

- i. the Prior Year Revenue Requirements ("PYRR");
- ii. the Forecast Period Capital Additions Revenue Requirements ("FC");
- iii. a True-Up ("TU") Adjustment; and
- iv. an Interest True-Up Adjustment.

The PYRR, FC, and TU Adjustment – including the Interest True-Up Adjustment – shall be designed to quantify SDG&E's cost to own, operate and maintain its transmission facilities.

The proposed effective date for the TO5 Formula was January 1, 2019. By order dated December 31, 2018, in Docket ER19-221, the Commission accepted SDG&E's TO5 Formula Rate and the related 2019 BTRR, suspended it for five months, to become effective June 1, 2019, subject to refund, and established hearing and settlement judge procedures. On July 10, 2019, the matter was assigned to an Administrative Law Judge for conducting a hearing and issuing an initial decision.⁸

⁶ See "San Diego Gas & Electric Company, Transmission Owner Tariff, Volume 11."

⁷ The TO4 Formula was embodied in an Offer of Settlement and Settlement Agreement ("TO4 Settlement") submitted on February 4, 2014, which the Commission approved on May 27, 2014. *San Diego Gas & Electric Company*, 147 FERC ¶ 61,150 (2014).

⁸ See ER19-221, Order of Chief Judge Terminating Settlement Judge Procedures, Designating Presiding Administrative Law Judge, and Establishing Track III Procedural Time Standards (July 10, 2019).

On October 18, 2019, SDG&E submitted an Offer of Settlement (“Settlement”).⁹ The Settlement was intended to resolve all issues set for hearing with respect to the TO5 formula, and would make the TO5 formula as contained in the Settlement effective June 1, 2019.¹⁰ The Commission Trial Staff and all Intervenors indicated that they either support or do not oppose resolution of this proceeding according to the terms and conditions described in the Settlement.¹¹ On November 7, 2019, Commission Trial Staff filed comments supporting the Settlement.¹² As of the date of this filing, the Settlement remains pending before the Commission.

The TO5 Formula specifies that each year, SDG&E will make an Annual Informational Filing (“Cycles”) on or before December 1 of each year, revising the BTRR and the associated rates to become effective on January 1 of the upcoming year. As noted, this instant filing consists of TO5 Cycle 2 Annual Informational Filing. As a good faith effort in support of the unopposed Settlement, SDG&E is implementing the principles agreed to in the pending Settlement in TO5 Cycle 2. As noted, however, the Settlement remains pending before the Commission. SDG&E reserves the right to re-file or revise this Informational Filing if the Settlement is not approved, in full, by the Commission.

I. NATURE AND PURPOSE OF FILING

Under the terms of the proposed TO5 Formula, this filing revises SDG&E’s BTRR and transmission rates for retail End Use customers and CAISO Wholesale customers for the Rate Effective Period (“REP”) beginning January 1, 2020 and continuing through December 31, 2020. The revised transmission rates are based on certain recorded and estimated costs information. More specifically, the TO5 Cycle 2 rates reflect a revised BTRR for retail End Use and CAISO Wholesale customers consisting of the following components:

- (1) PYRR for the 12-month period ending December 31, 2018;
- (2) FC for the 24-month period covering 2019 and 2020;
- (3) TU Adjustment for the 12-month Period from January 1, 2018 through December 31, 2018;¹³ and

⁹ See ER19-221, San Diego Gas & Electric Company submits tariff filing per 385.602: SDGE TO5 Formula Settlement Filing to be effective 6/1/2019 under ER19-221 (Oct. 18, 2019).

¹¹ *Id.*

¹² See, Comments of the Commission Trial Staff Supporting the October 18, 2019 Offer of Settlement by San Diego Gas & Electric Company under ER19-221 (Nov. 7, 2019).

¹³ SDG&E also notes that the TO4 Formula expired on December 31, 2018 and contained provisions in the TO4 Formula Rate Protocols for a Final True-Up Adjustment, which “shall

(4) An Interest True-Up Adjustment.

The PYRR, FC and TU Adjustment, including the Interest True-Up Adjustment, are designed to quantify SDG&E's cost to own, operate, and maintain its transmission facilities. Key elements of the filing are summarized below.

II. LIST OF DOCUMENTS SUBMITTED

This filing consists of one Volume with the following contents: Transmittal Letter with Appendix I; the Excel Model of the TO5 Cycle 2 Formula Rate Spreadsheet; Cost of Service Statements for the Base Period – including Statements BK-1 and BK-2 that develops the BTRRs for retail End Use customers and CAISO Wholesale customers, respectively – Statement BL, setting forth applicable retail rate design and CAISO High Voltage and Low Voltage Transmission Revenue Requirements; Base Period and True Up Period Work Papers; and Forecast Period Capital Additions Work Papers.

III. SUMMARY OF THE TRANSMISSION FORMULA REVENUE REQUIREMENTS FOR THE TO5 CYCLE 2 RATE EFFECTIVE PERIOD

Consistent with the Settlement's terms, SDG&E's TO5 Cycle 2 formulaic $BTRR_{EU}$ for the 12-month REP between January 1, 2020 and December 31, 2020 will collect from retail End Use customers approximately \$868.3 million in revenue requirements, representing a \$44.5 million increase, or a 5.4% change, compared to the End Use revenue requirement for TO5 Cycle 1 that was agreed to in the pending Settlement.

The TO5 Cycle 2 BTRR for $BTRR_{CAISO}$ equals \$865.5 million, representing a \$45.5 million increase, or a 5.5% change, compared to the wholesale CAISO revenue requirement for TO5 Cycle 1 that was agreed to in the pending Settlement. As indicated above, SDG&E has included an Appendix I to reflect CAISO Transmission Access Charge information required by the CAISO Tariff.

The End Use and CAISO wholesale customers' BTRR is comprised of the following components (all amounts in \$ millions):

2018 Prior Year Revenues	=	\$763.0
Forecast Period Revenues	=	\$80.3
12-month TU Adjustment	=	\$12.9
Interest TU Adjustment	=	\$1.8
Franchise Fees/Uncollectibles	=	\$10.3

be determined using the same calculation methodology as the Annual True-Up Adjustment and shall be applied to the next successor rate." Accordingly, as discussed below, the True-Up Adjustment for 2018 will be incorporated in the TO5 Cycle 2 Formula.

Total Retail BTRR = \$868.3

Wholesale BTRR Adjustments:

So. Georgia Tax Adjustment = \$(1.3)

Franchise Fees/Uncollectibles = \$(1.5)

Total Wholesale BTRR = \$865.5

The net increase in transmission rates is attributed primarily to the following factors:

- an increase in PYRR resulting from higher operations and maintenance expenses, depreciation expense, property and payroll taxes, and transmission rate base;
- BTRR Adjustments made in 2019 to Reflect Correction of Errors related to SDG&E's calculation of its Accumulated Deferred Income Taxes ("ADIT") offset by the Tax Cuts and Jobs Act legislation changing the Federal Income Tax rate from 35% to 21%; and
- a decrease in the 24-month total Weighted Forecast Plant Additions and True-Up Adjustments between TO5 Cycle 2 and Cycle 1.

IV. MISCELLANEOUS MATTERS

Error Correction: Section C.5 of the TO4 Formula Rate Protocols outlines the process for the correction of errors:

In the event SDG&E or any Interested Party identifies an error in the TO4 Formula or the FERC Form 1 data or data based on SDG&E's books and records that is used as an input to the formula, or SDG&E is required by applicable law, a court, or regulatory body to correct an error, and such error affects the True-Up TRR calculated in an Informational Filing, SDG&E shall include in its next subsequent Informational Filing a brief description of the errors included in its prior informational filing that must be corrected.

During the process of developing the TO5 Formula and the derivation of the instant Cycle 2 BTRR, SDG&E identified two errors related to the following: 1) the Amortization of Transmission Related Investment Tax Credits ("ITC") and Amortization

of Transmission Related Excess Deferred Tax Liabilities; and 2) the amount of Plant Held for Future Use (“PHFU”) used to derive rate base.

As to the first error, SDG&E determined that a mistake existed in the TO4 Formula mechanism used to derive the BTRR. The Amortization of the Transmission Related ITC and Transmission Related Excess Deferred Tax Liabilities were being deducted twice – first as a straight deduction in the derivation of the PYRR component of the total BTRR on Statement BK-1, and second as an adjustment to derive the federal income tax expense component of the total BTRR on Statement AV. In this TO5 Cycle 2 filing, the 2018 rate year is being trued-up for the last time. SDG&E has thus corrected the error indicated above to derive the 2018 final true-up adjustment under the TO4 Formula Rate mechanism by removing the deduction in the derivation of the PYRR component of the BTRR on Statement BK-1.

As to the second error, SDG&E determined that the amount disclosed in the FERC Form 1 footnotes associated with PHFU, a rate base item, was overstated. SDG&E used the correct PHFU amount – which is less than the amount identified in the FERC Form 1 footnotes – to derive the PYRR and the True-Up Adjustment components of the TO5 Cycle 2 BTRR. Since the amount at issue is minor and to the benefit of ratepayers, SDG&E will not be re-filing it’s 2018 FERC Form 1 to make the correction.

TO5 Formula Rate Model Updates: SDG&E made several updates to the Excel Formula Rate Spreadsheet Model to update the reference directing stakeholders to the proper sources for the data. These changes are non-substantive in nature and do not affect how the BTRR is derived. The list of changes is shown in the tab labeled “Model Reference Updates.”

These represent plant depreciation and amortization expense transfers to comply with FERC Order No. 888 and reflect the adjusted Transmission plant depreciation and amortization expense.

¹ Per Books Total Transmission Depreciation Expense (Col. 1) can be found in the FERC Form 1; Page 336; Line 7; Col. f.
² Ratemaking Total Transmission Depreciation Expense (Col. 7) is the sum of Total Transmission Depreciation Expense plus the SWPL Adjustment referred to in Footnote 3 below.
³ Total Transmission Depreciation Expense for Ratemaking (Col. 7) = (FERC Form 1; Page 450.1; Sch. Pg. 336; Line 12; Col. f; Transmission Total) + (FERC Form 1; Page 115; Line 9; Col. g) The \$15,744 in expense on FERC Form 1; Page 115; Line 9; Col. g, represents the annual amortization expense of the capitalized difference between CPUC & FERC's recognized in-service dates for the Southwest Powerlink. The difference is recorded in deferred debit FERC Acct 186 and the amortization of the difference is included in Acct 406. The amortization is considered a ratemaking adjustment with the annual expense continuing over the 30 year amortization life of the line, ending in 2023.

NOTES:

⁴ The revenues above are derived by multiplying the forecast billing determinants by the rates, except for Medium & Large Commercial/Industrial, Schedule PA-T-1, and Standby customers.

The derivation of revenues for Medium & Large Commercial/Industrial, Schedule PA-T-1, and Standby customers are shown on Pages BG-6, BG-7, BG-8, BG-9, BG-12, and BG-13.

⁵ Revenues for Medium and Large Commercial/Industrial customers include revenues of Standard Customers that have Maximum On-Peak Demand rates and Maximum Demand at the Time of System Peak rates based on SDG&E's on-peak period of 4-9 p.m. everyday year-round because SDG&E currently has no customers on Grandfathered Maximum On-Peak Demand rates and Maximum Demand at the Time of System Peak rates, which are based on SDG&E's previous on-peak period of 11 a.m. - 6 p.m. summer and 5-8 p.m. winter on weekdays.

NOTES

- 1 The High Voltage (HV) Access Charge Rate is the CAISO TAC Rate of \$12.5924 per MWh according to the CAISO TAC rate summary in effect July 11, 2019 and is based on the TO5-Cycle 1 Filing HV-BTRR. The High Voltage Access Charge Rate was held constant in developing this statement because there will be a change in the HV Access Charge Rate once the CAISO implements the TO5 Cycle 2 Wholesale BTRR.

NOTES

- The High Voltage (HV) Access Charge Rate is the CAISO TAC Rate of \$12.5924 per MWh according to the CAISO TAC rate summary in effect July 11, 2019 divided by 1,000 and is based on the TOS-Cycle 1 Filing HV-BTRR. The High Voltage Access Charge Rate was held constant in developing this statement because there will be a change in the HV Access Charge Rate once the CAISO implements the TOS Cycle 1 Informational Filing Wholesale BTRR.
- The Low Voltage Access Charge Rate information comes from the TRBAA filing in Docket No. ER 18-211, filed on November 1, 2017, for the rate effective January 1, 2018 through December 31, 2018.

¹ Represents the true-up adjustment from the previous annual cycle filing. SDG&E accrues interest until the amount is fully collected/refunded in rates.
² Rates specified on the FERC website pursuant to Section 35.19a of the Commission regulation.
³ The Cumulative Overcollection / Undercollection is: 1) the beginning balance in Column 2 for January; and 2) the previous month balance in Column 6 for all subsequent months.
⁴ Interest is calculated using an average of beginning and ending balances: 1) January uses the entire balance from Column 4; and 2) subsequent months use the average of the prior month balance in Column 6 and the current month balance from Column 4.

1 Rate is an average of the base period FERC Rates presented in the True-Up worksheet in Column 7 to derive a more accurate and consistent amortization amount (Column 4).
 2 The Beginning Balance is: 1) the balance in Column 6; Line 18 from the Interest True-Up Base Period for January; and 2) the balance from previous month in Column 7 of this worksheet for all subsequent months.
 3 Amortization reduces the beginning balance to zero by the end of December and is derived as follows:
 Beginning Balance / {[(1+Rate)¹² - 1] / [Rate * (1+Rate)¹²]}

Notes
 (1) The term "Exempt" means the project is exempt from a Permit to Construct (PTC) or GPCN
 (2) CPUC Approval Status is categorized as Effective, Pending or Forecast. Each category is defined as follows:
 Effective - GO 131-D Approval Obtained
 Pending - under CPUC Review
 N/A Not Applicable
 N/A Not Applicable
 Due to the numerous small transmission projects and the varying CPUC licensing requirements included in each blanket budget, no single determination will apply.
 Instead, each project within a blanket budget will be assessed individually and applicable licensing requirements will be followed.
