Question 1 (Continued)

SDG&E Response:

The attached excel file, "A1504012_TURNDR1.xls", provides the class and system-average rates highlighted in yellow as requested for years 2001-2017. The 2001-2006 average rates are calculated based on actual annual revenues divided by actual annual sales by class and rate category. The 2007-2016 class average rates are based on authorized revenues, rates and sales, and the 2017 average rates are consistent with the 2017 average rates presented in this 2016 GRC Phase 2 proceeding. All rates provided are system rather than bundled. SDG&E does not have the information broken out by bundled for the time period requested and thereby provided system for consistency.
