

Understanding Your Export Data and Pricing

The Export Data and Pricing table shows your export activity, pricing and the credits you receive each bill period. Visit My Account at sdge.com/MyAccount to download your data each bill period.

See how SDG&E® calculates your Total Delivery Export Credits using the data in the example table below.

Note: Delivery Export Pricing varies by time of day in 15-minute intervals.

As a Community Choice Aggregation (CCA) customer, your Generation Export Credits are determined by your CCA. Please refer to your CCA for more information about Generation Export Pricing and Credits.

How are my Delivery Export Credits calculated?

$$\text{Export kWh} \times \text{Delivery Export Price} = \text{Delivery Export Credits per Interval}$$

Multiply the Export kWh by the Delivery Export Price to calculate the Delivery Export Credits for that 15-minute interval. Then, add all Delivery Export Credits per Interval together to calculate the total Delivery Export Credits for that bill period.

Terms and Definitions:

- 1 **Total Export kWh:** The total kWh your system sent to the grid this bill period. This amount is calculated by summing the Export kWh column.
- 2 **Total Delivery Export Credits:** The total dollar amount you earned this bill period for the electricity your system sent to the grid. This amount is calculated by summing the Delivery Export Credits per Interval column.
- 3 **Date:** The month, day and year.
- 4 **Start Time:** The start time for each 15-minute pricing interval.
- 5 **Export kWh:** The amount of kWh your system sent to the grid.
- 6 **Delivery Export Price:** The delivery export compensation rate.
- 7 **Delivery Export Credits:** The dollar amount you received as compensation for the electricity your system sent to the grid.
