

**SOUTHERN CALIFORNIA GAS COMPANY
SAN DIEGO GAS & ELECTRIC COMPANY**

**APPLICATION FOR REVIEW OF COSTS INCURRED IN EXECUTING
PIPELINE SAFETY ENHANCEMENT PLAN (PSEP)
(A.18-11-010)**

(Cal PA Data Request-02)

Date Requested: November 20, 2018

Date Responded: December 17, 2018

QUESTION 01:

Please provide the respective historical pressure test records associated with the list of projects in Attachment 1 only for the segments where SoCalGas/SDG&E are requesting cost recovery from ratepayers. By historical pressure test records, the Public Advocates Office is referencing pressure tests conducted prior to the initiation of the PSEP program, such as post-installation pressure tests, or pressure tests conducted due to class location changes. If the test record for a segment requiring cost recovery from ratepayers is not available, please highlight the respective segment and explain why the test record(s) is not available. In the response, please also include:

- A) Engineering Start and End points in units of feet for each segment
- B) Date of the most recent pressure test performed on the segment
- C) Date of the historical pressure test

RESPONSE 01:

The attachment includes Confidential and Protected Materials provided pursuant to PUC Section 583, GO 66-D, D.17-09-023, the accompanying declaration, and/or non-disclosure agreement.

SoCalGas/SDG&E and CalIPA held a telephonic conference on December 4, 2018 to discuss this data request. The parties agreed that: (1) this request seeks information with respect to those segments operating over 30 percent Specified Minimum Yield Strength (SMYS); (2) subparts (B) and (C) request the date of the most recent pressure test conducted prior to the PSEP pressure test; and (3) at this time, SoCalGas/SDG&E need not produce the actual historic pressure test documentation, but should approximate how much time it would take to review archived records in order to produce the actual pre-PSEP pressure test documents.

See attached spreadsheet for the requested information.

- A) See columns E and F.
- B) See column G, where SoCalGas/SDG&E indicate the date of the most recent pre-PSEP pressure test.
- C) See response to item B above. Note: Compilation of the historic pre-PSEP pressure test documents will require review of archived historical work order packages and may require approximately three months.
