1 **PREPARED SUPPLEMENTAL TESTIMONY OF**
2 **SHERI MILLER**
3 **ON BEHALF OF SAN DIEGO GAS & ELECTRIC COMPANY**

4 **I. INTRODUCTION**

5 In June 2023, the California Public Utility Commission (“Commission” or “CPUC”)
6 approved Decision (“D.”) 23-06-006 in Rulemaking (“R.”) 17-06-026, modifying the calculation
7 of the Power Charge Indifference Adjustment (“PCIA”) by (a) establishing a new market price
8 benchmark (“MPB”) and an allocation mechanism to address the “greenhouse gas-free”
9 incremental value of large hydroelectric energy resources above fossil fuel resources, and (b)
10 revising the calculation of the Energy Index MPB to improve accuracy and transparency. In
11 accordance with D.23-06-006, San Diego Gas & Electric Company (“SDG&E”) hereby submits
12 this supplemental testimony to provide the Energy Index MPB weighting factors to be used in its
13 2024 Energy Resource Recovery Account (“ERRA”) Forecast.

14 **II. BACKGROUND**

15 In D.22-01-023, the Commission indicated its intention to consider refinements to the
16 calculation of the Energy Index MPB that is used to approximate the market value of energy
17 from all PCIA resources.¹ In response to a ruling issued by Administrative Law Judge Wang, the
18 investor-owned utilities (“IOUs”) filed a joint proposal to refine the Energy Index MPB that was
19 adopted in D.23-06-006 as Appendix B.² Specifically, D.23-06-006 directed the IOUs to
20 calculate the Energy Index MPB weighting factors set forth in Appendix B going forward and
21 provide the results and underlying data in their respective ERRA Forecast applications. For the

¹ See D.22-01-023 at Conclusions of Law 3.

² R.17-06-026, Administrative Law Judge’s Ruling Regarding Market Price Benchmarks (April 18, 2022). The IOUs’ joint proposal was submitted on May 27, 2022.

1 2024 ERRA Forecast, the IOUs were directed to submit supplemental testimony with the
2 calculated Energy Index weighting factors for 2024 by August 15, 2023.³

3 **III. THE PCIA ENERGY INDEX CALCULATION**

4 **A. Energy Index Refinements**

5 Prior to D.23-06-006, the Commission provided the Energy Index MPBs on an annual
6 basis, in the week before the October Update filings of the IOUs' ERRA Forecasts, based on
7 Platts forward on-peak and off-peak energy prices. These prices were used by the IOUs to
8 estimate the market value of the energy from PCIA resources in the forecast filing, using bundled
9 load weightings to determine the ratio of on-peak versus off-peak prices. Appendix B of D.23-
10 06-006 refines the Energy Index by calculating a factor to be multiplied by the Commission-
11 provided energy benchmarks. The factor is a measure of the difference between a three-year
12 historical average of actual energy revenues received for PCIA resources and the actual average
13 California Independent System Operator ("CAISO") SP15 day ahead market prices.

14 In addition, Appendix B requires that the IOUs replace the previous method of using
15 bundled load weightings to determine the ratio of on-peak to off-peak prices with a method
16 based on time weightings. Specifically, it requires the hours given in the CAISO calendar hours
17 trading schedule to be used in determining the ratio.

18 **B. SDG&E Compliance**

19 SDG&E has completed its calculation of its weighting factors to be used in its 2024
20 ERRA Forecast filing. In accordance with Appendix B, the portfolio weighting was calculated
21 using historical data from the last three full years, which include 2020, 2021, and 2022. The
22 actual revenue received from CAISO for each PCIA resource was summed and then divided by

³ D.23-06-006, Ordering Paragraph 6.

1 the total portfolio generation. An average price was then calculated and compared to the actual
2 average CAISO SP15 day-ahead prices for the same time period to arrive at the portfolio
3 weighting.

4 The time weighting was determined using the methodology provided in Appendix B,
5 which considers hours ending 7 to 22 as on-peak on weekdays and Saturdays. Sundays, North
6 American Electric Reliability Corporation (“NERC”) holidays, and hours 23 to 7 during
7 weekdays and Saturdays are considered off-peak. SDG&E’s calculation of its Energy Index
8 weighting is shown in the CONFIDENTIAL **Attachment A** - “SDG&E ERRa Forecast Energy
9 Index Calculation.xls”.

10 **IV. SG&E’S 2024 ERRa FORECAST APPLICATION**

11 In its 2024 ERRa Forecast application filed on May 15, SDG&E used the latest Energy
12 Index prices that were provided by Energy Division on September 30, 2022 as its Energy Index
13 MPBs. SDG&E now submits this Supplemental Testimony to implement the Energy Index
14 methodology refinements ordered in D.23-06-006 and will utilize this new calculation and
15 methodology to determine its final energy benchmarks for the October update to its 2024 ERRa
16 Forecast filing, once it receives updated benchmarks from Energy Division.

17 **V. CONCLUSION**

18 By submitting this supplemental testimony and accompanying attachments, SDG&E is
19 demonstrating compliance with the directives given in D.23-06-006.

20 This concludes my prepared supplemental testimony.
21

1 **VI. QUALIFICATIONS**

2 My name is Sheri Miller. My business address is 8315 Century Park Court, San Diego,
3 CA 92123. I am employed by SDG&E as a Principal Settlement Advisor in the Settlements &
4 Systems group in the Energy Supply organization. My responsibilities include writing and
5 reviewing ERRA witness testimony and advising on regulatory and legislative matters that
6 impact SDG&E's energy and gas procurement settlements and cost recovery processes.

7 I joined SDG&E in October 2000, and since that time, I have held various positions at
8 SDG&E including Senior Accountant, Principal Accountant, and Settlements Manager. I have
9 experience with many aspects of SDG&E's accounting processes, including approving the gas and
10 electric commodity invoices and overseeing the reporting processes.

11 I received a Bachelor of Science degree in Accounting and a Masters of Business
12 Administration from National University. I am also a Certified Public Accountant licensed in
13 the state of California.

14 I have previously testified before the California Public Utilities Commission.

Appendix B

Summary of Joint IOUs' Proposal to Modify Energy Index Weighting

1. Proposed Methodology Changes

The Joint IOUs propose to make two changes to the Energy Index MPB calculation methodology to better reflect energy supply in the Joint IOUs' PCIA-eligible portfolios.

- a. First, the IOUs propose to apply on- and off-peak weightings that are based on time weightings as opposed to bundled load weightings to the on- and off-peak Platts data provided by Energy Division. This is achieved by using the CAISO calendar hours trading schedule that considers hour-ending (HE) 7 to HE22 as "on-peak" and HE23 to HE7 as "off-peak" during weekdays and Saturdays and all 24 hours as "off peak" for Sundays and North American Reliability Corporation (NERC) holidays. These weightings would replace the current on- and off-peak load weightings used in the Inputs tab of the common PCIA workpaper template and result in translating the on-peak and off-peak Platts data into a simple average index price equivalent to be applied against the portfolio weights presented below.
- b. Second, after the IOUs complete the time weighting described immediately above, each IOU will then calculate a "portfolio weighting" that reflects the three-year historical variance between the energy revenues received from PCIA-eligible resources and the actual average NP15 (for PG&E) or SP15 (for SCE and SDG&E) day ahead market prices over that same time period.⁸³ The portfolio

⁸³ The Joint IOUs propose using three-years of historical data to normalize any anomalous market patterns that may exist in a single year and result in outliers having a less significant impact on the calculation. The Joint IOUs propose to use three full years of historical data,

Footnote continued on next page.

weighting is calculated using the historical annual weighted average price of the PCIA-eligible portfolio divided by the average 12-month CAISO day ahead trading hub price (SP15 for SCE and SDG&E or NP15 for PG&E) as shown below. This relationship between the historical PCIA-eligible portfolio average price and the average 12-month CAISO trading hub price results in a factor or portfolio weighting that is then used to provide a more accurate forecast of the Energy Index MPB. This adjustment is necessary as the portfolio weight adjusts the PABA portfolio performance appropriately against the trading hub prices. This "portfolio weighting" is then applied to determine the forecast Energy Index MPB that will be used to set PCIA rates on a forecast basis. This change requires one additional line item to be added to the Inputs tab of the common PCIA workpaper template.

Each IOU is responsible for determining this weighting and will support the calculation in its October Update, which uses the following formula:

$$\text{Portfolio Weight} = \frac{\left(\frac{\text{Actual PABA Portfolio Revenue}}{\text{Actual PABA Portfolio Volume}} \right)}{\text{Average SP15 or NP15 Actual Day Ahead Price}}$$

The result of these changes is that the Energy Index MPB calculation would reflect both supply portfolio and time weights to determine a single MPB price as shown using the formula below.

$$\text{Energy Index MPB} = \left(\text{Platts}_{\text{OnPeak}} \times \text{TimeWeight}_{\text{OnPeak}} \right) + \left(\text{Platts}_{\text{OffPeak}} \times \text{TimeWeight}_{\text{OffPeak}} \right) \times \text{Portfolio Weight}$$

2. Proposed Implementation Plan

The Joint IOUs proposed the following roles, responsibilities, and process for implementation:

meaning the portfolio weighting for 2023 forecast rates would be based on historical data from 2019-2021.

- a. The Joint IOUs proposed for the Energy Division to continue to provide the Platts-based inputs that the IOUs would then use to calculate the Forecast Energy Index MPB used in common PCIA workpaper template. This will result in consistent transparency (and costs) with what exists today.
- c. The IOUs will then apply the new on- and off-peak weightings using the inputs described above, which is consistent with what the IOUs currently do (i.e., each IOU is responsible for providing the bundled load weightings today). The IOUs will also include data on the calculation of the portfolio weighting in the October Update submittals, which will provide full transparency into that new input.
- d. The Joint IOUs believe the cost of obtaining the necessary data and performing the calculations to be de minimis given that the Platt's subscription is already recovered via the ERRA in generation rates and the two proposed modifications will be performed by the IOUs using existing data.
- e. The Joint IOUs expect that the Energy Division's workload will remain the same, except that it will need to review an additional input calculated by the IOUs in the October Update.
- f. The IOUs will include information in their October Updates that supports the weightings described above.

(END OF APPENDIX B)

Calculation of the Market Price Benchmarks for the Power Charge Indifference Adjustment Forecast and True Up

September 30, 2022

Pursuant to Decision (D.) 22-01-023, Energy Division issues the following values for the Power Charge Indifference Adjustment (PCIA) Forecast and True Up, which the investor-owned utilities (IOU) will use for their 2023 Energy Resource Recovery Account (ERRA) Forecast Updates in early October, 2022. The PCIA calculations incorporate Market Price Benchmarks (MPB) – the Energy Index, Renewable Portfolio Standard (RPS) Adder, and Resource Adequacy (RA) Adder – as defined by D.18-10-019 and revised by D.19-10-001 and D.22-01-023. D.22-01-023 directed Energy Division to calculate and distribute these values by the first business day in October each year.

Table 1. Market Price Benchmarks Used in PCIA Calculations

2022 Final Market Price Benchmarks				
		PG&E	SCE	SDG&E
RA Adder	System RA	\$8.11		
	Local RA	\$6.84	\$6.60	\$6.60
	Flexible RA	\$6.93		
RPS Adder		\$13.24		

2023 Forecast Market Price Benchmarks				
		PG&E	SCE	SDG&E
Energy Index ¹	On-Peak	\$88.87	\$85.47	████████
	Off-Peak	\$77.22	\$74.17	████████
RA Adder	System RA	\$7.39		
	Local RA	\$6.93	\$6.74	\$6.98
	Flexible RA	\$7.15		
RPS Adder		\$12.63		

¹ The Energy Index is based on Platts forward prices and is a forecast MPB only. There is no “final” Energy Index. Final energy values in PCIA are actual market prices for the given year.

ATTACHMENT B

DECLARATION OF SHERI MILLER

**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

**DECLARATION
OF SHERI MILLER**

A.23-05-013

**San Diego Gas & Electric Company's (U 902-E)
Supplement to CPUC Approved New Calculation for the Power Charge Indifference
Adjustment (PCIA) Energy Index Market Price Benchmark**

I, Sheri Miller, declare as follows:

1. I am a Principal Settlements Advisor for San Diego Gas & Electric Company ("SDG&E"). I submitted Supplemental Testimony ("Testimony") in support of SDG&E's May 15, 2023 Application for Approval of its 2024 Electric Procurement Revenue Requirement Forecasts and GHG-Related Forecasts ("Application"). As a Principal Settlements Advisor, I am thoroughly familiar with the facts and representations in this declaration, and if called upon to testify I could and would testify to the following based upon personal knowledge.

2. I am providing this Declaration to demonstrate that the confidential information ("Protected Information") in support of the referenced Application falls within the scope of data provided confidential treatment in the IOU Matrix ("Matrix") attached to the Commission's Decision ("D.") 06-06-066 (the Phase I Confidentiality decision). Pursuant to the procedure adopted in D.08-04-023, I am addressing each of the following five features of Ordering Paragraph 2 of D.06-06-066:

- that the material constitutes a particular type of data listed in the Matrix;
- the category or categories in the Matrix the data correspond to;
- that SDG&E is complying with the limitations on confidentiality specified in the Matrix for that type of data;
- that the information is not already public; and
- that the data cannot be aggregated, redacted, summarized, masked or otherwise protected in a way that allows partial disclosure.

3. The Protected Information contained in my Testimony constitutes material, market sensitive, electric procurement-related information that is within the scope of Section 454.5(g) of the Public Utilities Code.¹ As such, the Protected Information is allowed confidential treatment in accordance with the Matrix, as follows:

Location of Protected Information	Matrix Reference	Reason for Confidentiality and Timing
Amounts highlighted in yellow in Attachment A (“Attachment A - SDG&E 2024 ERRAs Forecast Energy Index calculation_CONFIDENTIAL”), tabs ‘Weight calculation’ and ‘volumes and revenues’.	XI	Detail of monthly variable cost on energy and utility operation (ERRA filings)

4. I am not aware of any instances where the Protected Information has been disclosed to the public. To my knowledge, no party, including SDG&E, has publicly revealed any of the Protected Information.

5. SDG&E will comply with the limitations on confidentiality specified in the Matrix for the Protected Information.

6. The Protected Information cannot be provided in a form that is aggregated, partially redacted, or summarized, masked or otherwise protected in a manner that would allow further disclosure of the data while still protecting confidential information.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed this 15th day of August 2023, in San Diego, California.

Sheri Miller

Sheri Miller
Principal Settlements Advisor
San Diego Gas & Electric Company

¹ In addition to the details addressed herein, SDG&E believes that the information being furnished in my Testimony is governed by Public Utilities Code Section 583 and General Order 66-D. Accordingly, SDG&E seeks confidential treatment of this data under those provisions, as applicable.
