PREPARED DIRECT TESTIMONY OF KELLEN C. GILL

I. INTRODUCTION

My direct testimony presents San Diego Gas and Electric Company's ("SDG&E") proposed rate recovery for the Assembly Bill ("AB") 2868 investments and program in SDG&E's 2018 Energy Storage Procurement and Investment Plan Application ("Application"). As explained in the direct testimony of SDG&E witness Stephen T Johnston, investments will focus on utility-owned energy storage microgrid projects that may provide multiple services, including resiliency, to public sector customers. SDG&E also proposes an Energy Storage Incentive for Expanded California Alternate Rates for Energy ("CARE") Pilot Program ("pilot program") that will focus on behind-the-meter opportunities to incentivize Expanded CARE facilities that serve low-income customers, as described in the testimony of Mayda Bandy.

II. COST RECOVERY, RATE AND BILL IMPACTS

As described further below, SDG&E proposes to recover the costs¹ of implementing the utility-owned energy storage microgrid projects through Distribution rates² and the pilot program through Public Purpose Program ("PPP")³ rates.

Table KG-2 presents the illustrative class average electric rate impacts for 2020 through 2023 of the proposed revenue requirements as presented in the direct testimony of Michael Woodruff/James Vanderhye Jr. (for the energy storage microgrid projects) and Mayda Bandy

Costs include (but are not limited to) distributed energy storage resources, labor and installation, electrical infrastructure, and staff necessary for equipment, maintenance, incentives and administrative support. *See* the direct testimony of Steven Prsha and Mayda Bandy for a detailed description of the costs.

The Distribution rate recovery component is described in the testimony of Ted Reguly.

³ The PPP rate recovery components is described in the testimony of Mayda Bandy.

(for the pilot program) compared to SDG&E's current⁴ rates. In addition, the revenue requirements presented in the direct testimony of Michael Woodruff/James Vanderhye Jr. and Mayda Bandy reflect revenue requirements beginning in 2019. SDG&E proposes to combine the 2019 and 2020 revenue requirement and recover the 2019 revenue requirement in 2020 to coincide with SDG&E's rate change occurring on January 1, 2020.⁵ The amount SDG&E proposes to recover in rates in 2020 is based on the revenue requirements presented in the testimony of Michael Woodruff/James Vanderhye Jr. and Mayda Bandy. Table KG-1 the amounts to be collected through Distribution and PPP rates in 2020 based on the revenue requirements presented in the testimony of Michael Woodruff/James Vanderhye Jr. and Mayda Bandy, respectively (without FF&U).⁶

Table KG-1: 2020 Revenue Requirement (without FF&U)

2020										
	Distribution PPP			Total						
Energy Storage Microgrid Projects	\$	20,765,284			\$	20,765,284				
Pilot Program										
Incentive			\$	1,627,083	\$	1,627,083				
Non-incentive										
Administrative				155,833		155,833				
Marketing				25,000		25,000				
Workforce, Education & Training				30,000		30,000				
Total Pilot Program			\$	1,837,916	\$	1,837,916				
Total Revenue Requirement	\$	20,765,284	\$	1,837,916	\$	22,603,200				

Advice Letter 3176-E, pending Commission approval, effective January 1, 2018.

⁵ Timing of implementation is dependent upon approval.

⁶ FF&U is Franchise Fees and Uncollectibles.

Table KG-2: Illustrative Class Average Electric Rates Impact

In 2020, the illustrative annual bill impact based on the revenue requirements⁷ is an increase of approximately \$8.99 for a typical residential customer using 500 kWh per month in both the Inland and Coastal climate zones, as compared to current rates. On a percentage basis, this equates to an illustrative annual bill increase of 0.5%. In 2023 the illustrative annual bill impact based on the revenue requirements⁸ is an increase of approximately \$12.19 for a typical residential customer using 500 kWh per month in both the Inland and Coastal climate zones, as compared to current rates. On a percentage basis, this equates to an illustrative annual increase of 0.7%.

This concludes my prepared direct testimony.

⁷ See the direct testimony of Michael Woodruff and James Vanderhye Jr. and Mayda Bandy for further details regarding the revenue requirements.

⁸ *Id*.

III. WITNESS QUALIFICATIONS

My name is Kellen Childs Gill and my business address is 8330 Century Park Court, San Diego, California 92123. I am employed by SDG&E as a Rate Strategy Project Manager in the Customer Pricing Department. My primary responsibilities include planning, development, and implementation of rate-related proceedings and preparation of various regulatory filings.

I began work at SDG&E in March 2015 as a Regulatory Case Manager. Prior to joining SDG&E, I was employed by Sempra Energy where I worked in several positions of increasing responsibility in tax, accounting, internal audit and legislative policy beginning in June 2007.

I graduated from the University of San Diego with a Bachelor's degree in Business

Administration and a minor in Accounting. I went on to earn a Master of Science in

Accountancy with an emphasis in entity taxation from San Diego State University. I am also a

Certified Public Accountant licensed to practice in the state of California.

I have not previously testified before the California Public Utilities Commission.
